INDIANA PAINT & ROOFING CO.

MANUFACTURERS OF

Rubber Roofing,
Sheathing Papers,
Mixed Paints,
AND
Marbleized Slate Mantels.

OFFICE AND WAREROOMS:

143 Duane Street,

NEW YORK CITY.

← AND →

42 South Pennsylvania St.,

INDIANAPOLIS, IND.

Our Terms are Cash.

All orders are subject to our sight draft after shipment. Persons ordering from places where there is no Bank, will please say through what Bank we can collect in their banking town.

Persons without a commercial standing will please remit us with their orders.

Money can be remitted by Check, Postal Money Order, Registered Letter, or by Express.

We will not send goods C. O. D. unless the express charges are guaranteed. Many persons write us to ship by freight C. O. D. This we can not do without losing control of the goods, for railroad companies do not take freight in that way. If you want our goods, and have no commercial rating *worthy of credit*, send the money to us and we will ship to you at once.

In ordering say whether you want our TWO-PLY OR THREE-PLY Rubber Roofing. *Mention the price*, and if possible give shipping directions.

Very respectfully,

INDIANA PAINT AND ROOFING CO.,

42 South Pennsylvania St.,

INDIANAPOLIS, IND.

General Remarks.

All we say in this circular we believe to be true, but will not, nor do not hold ourselves responsible for leaky Roofs, (often improperly put on,) nor damage to goods after shipping in good order. Nor will we take any responsibility whatever, except to deliver every man what he buys and pays for, and the only guarantee we give, is on Roofs laid in this city by our own workmen; those we guarantee water-tight for five years.

R If you will send us the size of your building, and the pitch of Roof, we will send you estimate of cost for **complete materials**.

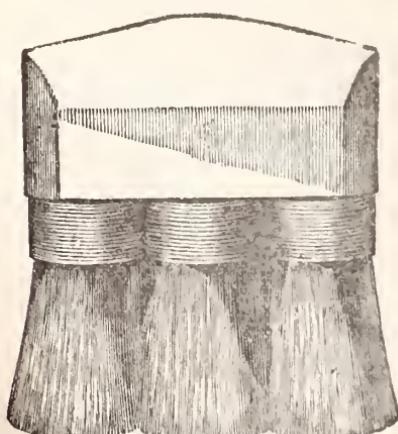

R When you order ten squares of Roofing **COMPLETE**, you get enough Roofing to cover ten squares of Surface, including the laps, fifteen gallons Slate Roofing Paint, ten pounds of Nails, and seven pounds of caps.

R In laying Rubber Roofing, if by any accident a hole should be made in the Rubber, put Cement over the hole, then a patch of Rubber six or eight inches square, nail and cap all around; do this after the main roof is laid and *before* painting.

R One gallon Slate Roofing Paint covers 200 to 300 square feet tin or iron; 50 square feet of old, or 7 square feet of *new* shingles; 100 square feet rough boards, or 200 square feet of new smooth boards. This is *about* the quantity required; a Flat shingle roof requires more.

R Should the Slate Paint be too heavy to work easy with a brush, thin with boiled Linseed oil or Japan drier.

 **Will Slate Roofing Paint effect cistern water?** is often asked by parties who reserve rain water for domestic purposes: in this connection we state that where *any* roof requires a coating of *any* kind, rain water should be *turned off* from the cistern, until after the first few rains. Slate Roofing Paint is no exception, although it is formed of the purest ingredients possible to procure. Slate is clean, odorless; Sand is one of the best filters of water; there is nothing in Slate Roofing Paint injurious to the health of man or beast. If water is reserved, *turn it off from the cistern* until after the first few rains, and no perceptible effect on cistern water will result: the paint becomes hard and the sand over *second* coat of paint) soon asserts its superiority, as a purifier of water.

"Extra" Roofing brush, \$2.50

Manufactured expressly for our trade.

Before using new brushes, soak two inches of the Bristles in water a few hours.

"No. 3. For Shingles, &c. \$1.00

ABOUT INSURANCE.

WHAT THE UNDERWRITERS SAY:

NEW YORK BOARD OF FIRE UNDERWRITERS,
OFFICES, 156 AND 158 BROADWAY,
NEW YORK, NOVEMBER 20th, 1876. }

DEAR SIR:—The rate here on buildings covered with "Rubber Roofing," made of pure wool fibre, saturated with your Rubber Composition, covered with two coats of your Fire-proof Slate Paint (second coat sanded), is the same as our standard rate on tin roofs.

Yours respectfully,

JAS. HARRISON, SUPT.

One of our customers in Florida, seeing the above in our book circular and finding opposition to our Roofing by Insurance agents in that state, wrote to us for further information, whereupon we submitted his letter to the Supt. of the Board of Fire Underwriters who wrote the following in reply:

NEW YORK BOARD OF FIRE UNDERWRITERS,

BUREAU OF SURVEYS, BOREEL BUILDING,

115 BROADWAY. NEW YORK, SEPT. 11th, 1883.

W. E. Armstrong, Esq.,
Palatka, Fla.

DEAR SIR:—Your letter dated Aug. 7th, was handed me and am somewhat surprised at the opposition on the part of the Insurance Co's in your district to this class of Roofing.

We have no complaints here. This Roofing is placed on the same footing with tin roofs among our Companies, for which only a charge of 5c. is made; no additional charge made for Rubber Roofing and *no fear* entertained as to its safety in case of fire.

Nearly all, if not *all* of our large warehouses on the shore line of Brooklyn and New York are covered with this or a similar roofing. These buildings contain millions of dollars worth of goods. Specimens of Rubber Roofing were presented to our committee long ago, and approved as I have stated, making no greater charge than for a Tin roof. I have seen experiments on this roofing, by building fires on it without damage. In my own personal experience, I can testify to the value of this roofing. My own dwelling house was covered with tin, and bothered me by continually leaking. Five years ago I had this roofing put on and never have had a drop of leak since. I do not know how I can make myself understood in a stronger manner, if my former letter was weak. The roof was ranked *good* by our Board, and no charge has been made *I know*, for I am the party who would have promulgated such charge. I trust my statement will help you.

Yours truly,

J. HARRISON, SUPT.

NOTICE.

We are the *only* manufacturers of **RUBBER ROOFING**; it is our Trade-mark, has cost us half a million dollars to get it before the People, and is the *only* Roofing of the kind endorsed by the Public.

Any party whose name appears in this Book, may receive circulars and samples, (resembling ours), from some dealers in Coal Tar Roofing.

There is just as much difference between the goods these vultures *furnish*, and Rubber Roofing, as there is between the million Book circulars we issue and the few hundred little **hand-bills* these Beats send on.

DON'T BE DECEIVED.

If you want the class of goods these people offer, we will furnish them for one half the Book circular price, of **Rubber Roofing**.

*These "hand-bills" frequently contain testimonials, editorials, &c., given for *Genoone* Rubber Roofing or State Paint, which are stolen entire from our books of past years, notwithstanding such books are protected by U. S. copyright.

The above cut represents laying over rough boards our

RUBBER ROOFING

Price List in Store in New York or Indianapolis, Ind.

Temporary Roofing.

Heavy Single Ply, in Rolls of 325 Square Feet, per Roll . . . \$6.00

This price includes Nails, Caps, Cement and Paint for one coat.

Each Roll covers 3 squares (including 2 inches for lap.)

Weight per Roll complete materials, about 120 lbs.

TWO Ply Roofing.

Put up in Rolls to Cover one square (10x10 Feet,) \$3.25

This price includes Nails, Caps, Cement and Paint for two coats.

Weight per Roll complete material about 75 pounds.

Three Ply Roofing.

Put up in Rolls to Cover one Square (10x10 Feet,) \$3.75

This price includes Nails, Caps, Cement and Paint for two coats.

Weight per Roll complete materials, about 100 pounds.

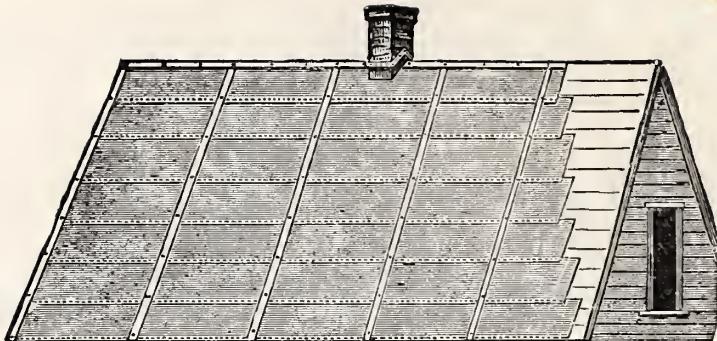

DIRECTIONS FOR USING RUBBER ROOFING.

Board the roof close, as shown in cut. Sweep clean of all nails, chips, etc. Commence at the eaves (or gutter), nail the lower edge once in two inches, using ordinary lath nails with thin heads, shielded with tin caps. Let the second sheet lap over the first about two inches, nail as before, and so repeat.

Great care should be taken to fit the Felt closely around the sky-lights, scuttles, chimneys, gutters, bulk-heads, flag poles, etc. and when used around such places should be turned up two inches and carefully fastened, with lath, boards or cleats, using Cement freely.

When the felt is all properly laid and fastened, then commence at the upper part and coat the entire surface with Slate Roofing Paint. After two or three days apply another coat and then sprinkle freely with clean, dry sand, immediately after the Paint is applied. Use as much sand as the Paint will absorb.

For Terms see Second page of Cover, (Book Circular.)

In exposed and windy places we recommend battings, or cleats, to run up and down the roof, as shown in the above cut. They can be laid 15 to 30 inches apart, and nailed with heavy nails, so as to have good hold in the sheeting boards. Common laths will answer the purpose, except at the end or edges of the roof; for these we advise strips one inch thick and two inches wide. *The latter should be put on all our roofs*, after laying the Rubber and before painting. When cleats are used, paint the roof in strips, and lay the cleat in the green paint, and nail. When this is done, paint the entire roof, cleats and all, as directed on another page.

RUBBER ROOFING

as made by us at our own factory, is prepared from felt, of a pure wool fibre, this is saturated in a compound which renders it entirely IMPERVIOUS to water; it is then rolled and re-rolled, under hydraulic pressure, until leaving our machinery it appears as a strong, compact, cleanly and pliable material, fitted for use wherever a weather-proof roof is wanted.

THE RUBBER ROOFING forms the base of our roof, which is yet to be completed by the application of two coats of **Slate Roofing Paint** (last coat sanded,) and we have no hesitation in saying that this roof, when kept painted, will last as long as the very best Tin roof, and without their liability to constant leakage.

We commend these materials for use—

1st—On **Dwelling Houses, Barns, Stables and Out-Houses** of all kinds, confident that they will give satisfaction wherever a durable and reasonably cheap weather-proof roof is wanted.

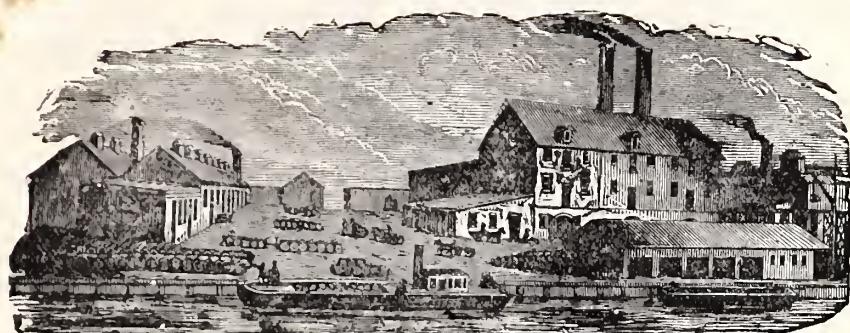

2d—On **Churches, Theatres, Warehouses, Railroad Depots, Bridges**, and all kinds of large buildings.

NOTE.—The noise caused by rain and hail on metal roofs, is leading the principal architects of the country to discard those metals, and substitute our Rubber Roofing, which is noiseless.

3d—On **Factories, Foundries, Mills, Machine Shops and Round [Engine] Houses, Chemical Works, Glass Factories, &c.**

NOTE.—For this class of roofs we claim for our materials special merits. Owing to the vibration of the building, caused by the action of heavy machinery, it has heretofore been found difficult to keep the roofs in order. Especially are tin roofs liable to be broken and drawn apart, by reason of the forces of contraction and expansion caused by the ever-varying temperature acting in connection with the vibration caused by the machinery. In addition to which the fumes arising from the chemicals in ingredients used in factories, and the steam from engines and boilers unite in destroying Tin roofs by corrosion. These causes have no effect on our Rubber Roofing.

4th—On **All Classes of Roofs, whether Flat or Steep**

SLATE ROOFING PAINT!

**FIRE-PROOF. WATER-PROOF. DURABLE. NO HEATING REQUIRED.
MIXED READY FOR USE.**

The Best in the World for Tin, Iron & Shingle Roofs.

Tested fifteen years, and used on nearly all the roofs in New York, Philadelphia and Cincinnati, as well as on the principal depots in the United States.

The paint is elastic, will expand and contract, with heat or cold, will not crack, peel or scale; being slate, will not rust or corrode. It will protect, preserve and improve rough wood work, and for brick walls it is the only reliable Paint ever introduced, that will effectually prevent dampness from penetrating and discoloring the plaster.

On decayed shingles, it fills up the pores and gives a new and substantial roof, that lasts for years. Curled or warped shingles it brings to their places, and keeps them there. Although a slow dryer, rain does not effect it. Our Paint, which (for shingle roofs) is chocolate color, when first applied, but soon changes to a uniform slate color, and is, to all intents and purposes slate, and proof against burning embers, as can be easily tested.

On tin roofs our red color is usually preferred, as one coat is equal to five of any ordinary paint.

For Factories, Foundries, Mills, Machine Shops, Warehouses, Engine Houses, Freight Cars, Depots, Farm and Seaside buildings, Bridges, Stables, Fences, etc., etc., it is expressly recommended.

OUR ONLY COLORS: RED, CHOCOLATE AND BRIGHT RED.

Leaky Roofs Made Good.

In all parts of the country are sheds and storehouses of many thousands of square feet in extent which have been covered with metal and shingle roofs at a great cost. Especially is this true of the cotton and tobacco sheds of the South, and the great storehouses along the Western rivers. In course of time they have come to leak in so many places as to seriously damage what they should protect. To repair them or to remove them and substitute another metal or shingle roof involves a large expense and many weeks of valuable time. Besides, in many places, it is with great difficulty skilled labor can be had in sufficient quantity to put on these new roofs between storms.

To repair such roofs quickly, surely and cheaply, has been to us, for a long time, a difficult problem. We have, at length, solved it. We have found that a heavy bodied Slate Roofing Paint, similar to that used for rubber roofing, but heavier, just answers the conditions. The application is simple. First go carefully over the roof and note all the holes in the shingles, or places rusted through the metal. Paint them over with the Slate Roofing Paint, lay over them a piece of felt or of cotton cloth, and then paint over the pieces with the Slate Paint.

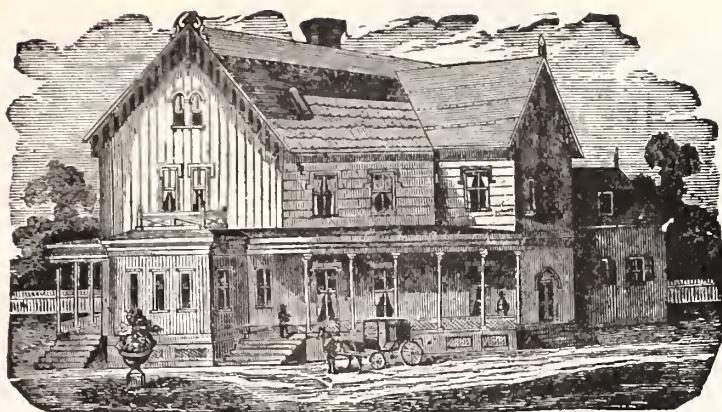

(For large holes in the roof, or about chimneys, sky-lights, etc., we recommend using our Slate Cement first, then paint and patch as above stated.)

When the roof has been thus thoroughly patched, give it a good covering of Slate Roofing Paint. A roof so defective as to be impossible to repair in the usual way can be made perfectly water tight and to last many years. The worst roofs will need two coats of this valuable preparation. Anyone can apply it, for we furnish it ready-mixed in any quantity, and it is easily applied with a good sized paint brush. Correspondence is invited with the owners of such roofs, and estimates furnished, or we will send men to repair them within any reasonable distance.

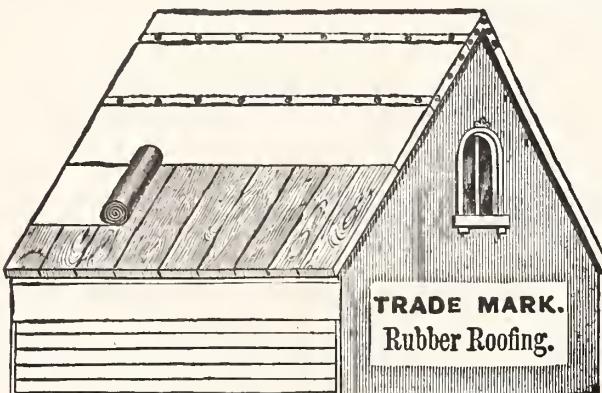

For quantity of paint required, see general remarks.

AGENTS.

We want live men as agents for our goods in every section of the country. They must be men of established reputation. Those identified with the building interests preferred. To such men we offer liberal terms.

RUBBER ROOFING, (Being Laid over Old Shingles.)

DIRECTIONS FOR LAYING ON STEEP ROOFS.

1st.—Begin at the *top*, having centre of first roll cover the ridge and extend over the *edge of roof* about $1\frac{1}{2}$ inches.

2d.—Unroll next layer, and snap a chalked line two inches from the *upper edge*, slide the *second layer* *under* the first, and secure by nailing through our metal caps. Always begin in the *centre* of the roof and nail along the lap to *each end*. The chalked line is necessary to obtain a uniform lap *entire* length of roll; otherwise you *may* nail the roofing *crooked*, and to straighten it *ridges* are formed;—the *next* layers are put on in the same manner.

3d.—With our Extra Roofing Brush apply the *first* coat of *Slate Roofing Paint* on the *three layers*; then proceed laying the roofing. Our object in so painting is that we are not continually tramping over the work.

THE ILLUSTRATION REPRESENTS.

First: Layer at peak. Second: Layer *complete* and ready to paint.

Third: Layer capped at top *only*. Fourth: Layer begin unrolled over rough boards.

Dotted lines represent "lap" of *under* roll. Circles over felt and at edge of roof are metal Caps.

"A little paint" has helped sell many a house, not only quickly, but at a far better Price.

Our Liquid House Paints.

We call your attention to our **Nassau Liquid Paints**—ready for immediate use on opening packages. We confidently offer these goods to consumers and the trade, as the very best that are made—for the following reasons:

COVERING CAPACITY—These Paints being made from the Best materials will consequently cover *better* and *more* surface than those that contain barytes or clay which add to the "weight" without increasing the body or covering quality.

PERMANENCY OF COLOR.—Great care being taken to use only permanent colors, our Tints do not fade and change color after being applied, as is the case where the only object is to *get the tint*, without reference to proper combination of Permanent colors.

CONVENIENCE.—Any one "who can use a paint brush" can apply them. Customers can select tints, and, if *additional* quantity is wanted, can always rely on getting *same shade*, and not have two or three shades *on same building* as is often the case where tints are made *experimentally*.

ECONOMY.—Being ready for use, there is no waste or excess of material, as is almost always the case where the customer buys Lead, Oil and Turpentine.

With our goods he can get the right *quantity* and use it all up.

We put these Paints up in packages, from Cans, $\frac{1}{2}$, 1, 2, 3 and 5 gallons, to Kegs, 10, 15 and 25 gallons, and Barrels 45 gallons.

PRICES PER GALLON.

White, for Inside	\$1.50
" Outside.....	1.50
Black, for Inside or Out.....	2.00

Yellows, " "	2.00
Greens, " "	2.50
Indian Red, " "	2.00
Vermillion, " "	3.00
Other Colors on Sample Card.....	1.50

N. B.—Customers wanting Special Shades, not on our Card, can have the same made, when ordered in sufficient quantity, by furnishing Sample of desired Color.

These Paints are of proper consistency for general work. Should any thinner be required, use only Raw Linseed Oil or Spirits Turpentine

TO ASCERTAIN AMOUNT REQUIRED.

To ascertain the amount of this paint required for any given surface, add the number of feet, *front and rear*, to the number of feet in length (*both sides*). Multiply this by average height and it will give the number of square feet to be painted. Divide this by 250 (one gallon covering 250 square feet, two coats) and it will give quantity of paint *in gallons* required.

Care should be used to see that the surface to be painted is dry before applying the paint.

EXAMPLE.

Front, 40	feet
Rear, 40	"
Side, 30	"
Side, 30	"
	140
Multiply by	25 feet
average height.	
Divide by 250	14
Result 14 Gallons for 2 coats.	

SEND FOR SAMPLE CARD OF COLORS.

Used over 15 years with satisfactory results.

FLEXIBLE

CEMENT.

A POSITIVE CURE FOR LEAKY ROOFS.

It is designed *expressly* for repairing breaks or nail holes in tin, metal or other Roofs, pointing up and repairing about chimneys where tin joins to brick or wood-work, flashings, copings, clapboards where houses join together, gutters, cupolas, dormer windows, skylights, hot-house frames, decks, or bottoms of boats, aquariums, water troughs or tanks, leaks in gas or water pipes, cementing seams in wood, stone or iron work, and in fact all places required to be made Water-tight.

It is chocolate color, contains no Tar or cheap oils, about the consistency of good putty, ready for applying with knife, stick or trowel, is very adhesive, perfectly elastic, does not injure water from moment of application, and cannot be washed off. This cement does not crack, peel off or blister in hot or cold weather, does the same service and lasts longer than Solder. After it is once applied, a skin commences forming over it, which soon becomes tough and hard, this process continues until the whole assumes a toughness like sole leather, and eventually becomes as durable as the article itself. One application being all that is required when used according to directions.

ABSOLUTELY FIRE, WATER AND DUST-PROOF.

See that the surface to be mended is perfectly clean and *dry*; then with a small trowel or stick, take out as much cement as necessary and press well into the hole, crack or cavity, always being mindful to cover up the whole leaky space thoroughly; then add sufficient to round off in the manner here shown: supposing the dot to be the leak or space mended.

In using the cement for pointing and mending, always, if possible, place it so that the greatest amount of pressure will be on the top, instead of underneath it, and be sure to follow above directions. *Should the Cement become stiff or too hard for easy working, before it is all used, warm and add a little oil or fat grease, and mix well together, then let cool.*

Every farmer and householder should have a can as with it, they can do their own Roof repairing, and thus save many times its cost. It also preserves articles which would otherwise be rendered worthless, and thrown away.

GENERAL DIRECTIONS FOR USE.

Metal Roofs.—Each seam should be *thoroughly* examined, and wherever the slightest crack, pin, nail hole or other break is found, apply the cement as above.

Shingle Roofs.—If the shingles be old and rotten, tear them off and put new ones on; if in good condition, find about where the leak is, then look for a knot-hole, split, crack or check in a shingle, about the place it over-laps a seam between two other shingles, above and below, so that there shall be no chance for the water to soak through to the rafters.

Chimneys.—Clean away the mortar, if the cavity should be very large, fill with rags or anything for a foundation, and apply plenty of cement on top and all around wherever there is an indication of a leak, being sure to press edges of cement down to the brick, stone or wood work, in all cases.

Skylights & Scuttles.—Press plenty of cement all around the two sides and top of skylight where it connects with the roof, or wherever a leak may shew itself; should the putty about the glass be old and loose, clip it all out clean, and add cement in the same manner as putty is applied.

Copings.—Stop all joints between the stones by pressing cement well in and rounding off as above; when the coping is close to the roof, fill up underneath the same, so that water may not beat up over tin or metal.

Leaky Joints.—Where additions are built to main houses; or about bay windows, etc., rain is frequently blown up under a clapboard; when such is the case, cement well all along the lower edge of the clapboard where tin runs under.

Mending Wooden Gutters, Water Troughs, &c.—Spread cement all along seam on inside, and let stand a day or two before letting water on.

Wash Tubs, Pails, &c.—Press the cement into leaky places and let stand without using several days so that the same may become thoroughly knit to the metal or wood. If placed inside hot water is apt to render the skin tender so that clothes, sticks, dippers, etc., may scrape it off if not careful. Tin, Wooden or other Ware not used over or about a fire.—May be repaired with equal facility and safety.

Leaky Water or other Pipes.—Press plenty of the cement into and over the entire cavity, wrap a cloth around tight and tie it well with a string, this after a day or two will withstand a pressure of 100 lbs. to the square inch.

ORDER A CAN—PRICE ONLY \$1.25.

CARPET FELT.

We keep in stock a soft elastic Felt, expressly for laying under carpets, put up in rolls 36 inches wide, and weighs about one pound to the yard. It is moth-proof, prevents dampness rising from cellars, and will last many years. This lining increases the thickness of the carpet, rendering it soft and pleasant to the tread, and is a great saving to the carpet.

Price 6 cents a yard.

TARRED SHEATHING PAPER.

We manufacture a tarred sheathing paper for using under slate, tin or shingles; also for sides of buildings before clapboarding. It is put up in rolls of about 325 square feet, and is sold for \$1.50 per roll, or three cents per pound.

We Want Active Business Men of Good Standing

to deal in our manufactures, and to parties carrying stock we will give Exclusive sale. Our materials are valuable, and **sell readily** after being fairly introduced; directions for using should be fully **complied** with, and the result will be **entirely satisfactory**.

Shingles may be "cheap," but Rubber Roofing when painted is **Fireproof**.

Then it is ready for use, and **any-body** can apply it. Shingles for flat roof are a total failure everywhere and always will be: Rubber Roofing will give perfect satisfaction, (and can be laid over the worthless shingles,) Slate Paint is made expressly for protecting and preserving old shingles, felt, tin, iron or other roofs, and in connection with Slate Cement will **effectually** stop leaks.

Slate Paint is Patented, and must not be confounded with Plastic Slate Paint, Excelsior Slate paint or any other imitation, all of which are simply **coal tar**, and always Black: Genuine Slate Roofing Paint is Red or Chocolate, no other color, and **never** Black. Reliable Roofing for any building, large or small, can be obtained of us quickly, cheaply, and in any quantity for.

Houses,

Mills,

Foundries,

Barns,

Factories,

Ware-houses,

Will You Be Our Agent?

Read carefully what our Book Circular states; what people say who have had practical **experience** with our goods, write us for estimate or other information wanted, and write **soon**.

We furnish agents with samples and circular free.

OFFICE

Indiana Paint and Roofing Company,

New York City, and 42 South Pennsylvania St., Indianapolis Ind.

Department of New York, Sept. 1st, 1884

TO OUR PATRONS.

About November 1st 1884, we propose to print and circulate one million copies 4th Edition, of our book circular. These will be mailed to the principal Builders, Lumber Dealers, Manufacturers and Farmers in North and South America, West Indies, Australia, India, Japan and the East and South coast of Africa. As you have used our Rubber Roofing and Slate Roofing Paint, will you kindly give us, in writing your opinion as to the merits of said articles, whether, good or bad and we will at least give you a free advertisement. Please reply as soon possible giving name and business in full and oblige,

Yours Respectfully,

INDIANA PAINT & ROOFING CO.

TO THE PUBLIC.

The above circular speaks for itself, please find replies on following pages, with a few exceptions, we have no personal acquaintance with any of the parties; their endorsement of our goods can therefore be *fully* relied on, and *your* custom is solicited.

INDIANA PAINT & ROOFING CO.

Red hot coals on Rubber Roofing.

I have used your Rubber Roofing with the best and most pleasing results, it is cheap and durable as any in the market: the Slate Roofing Paint or covering is the most perfect success of any paint I ever saw. To prove my above assertions, I wish to relate an instance that occurred to one of your roofs even before the sand was applied;—my tinner was spouting a building covered with your paint, and left the fire-pot full of charcoal, of red hot coals on the roof, and came to the shop on business; during his absence the pot was upset by a draft of wind, leaving at least a peck of hot coals burning there at least 45 minutes. They nearly burnt off the paint and first thickness of felt for space of probably two square feet; if it had been sanded, it would never have caught. I can freely and honestly recommend Rubber Roofing to the trade and to every one needing a cheap but good roof.

Mc COMB, O. Nov. 12, 1884.

R. C. BOWLUS, Building Materials.

Looks like boiler iron, and is hard as stone.

I covered a brick building 24 by 65 [roof 3 feet pitch to 65] with 3 ply Rubber; it has given entire satisfaction. The surface is as hard as stone, and has the appearance of boiler iron. I think it a durable and economical roof, and fully up to the high standard claimed.

FAYETTE, O. Nov. 1, 1884.

C. L. ALLEN, of ALLEN & ALLEN,

Grain and Produce.

House and Farm.—“the most complete roof.”

I have used your Rubber Roofing and Slate Roofing Paint on a house and large barn; am well pleased with them in fact, I would not exchange them for any other roofing I have seen. I cannot see how a better roof could be made than the one on my barn, as I had it well put on, and bound with galvanized iron, making the most complete roof I have ever seen.

TALMADGE, O. Nov. 6, 1884.

D. E. FENN, Farmer and Stock Raiser.

Bodine: versus Rubber Roofing.

The 2100 feet 3 ply Rubber Roofing received from you last June was put on my dwelling it has stood the heat of summer all right, and kept out the rain; if it stands the winter frost I will use no other hereafter. A neighbor of mine put on a Bodine roof in the same month, it leaked in seventeen places the last rain, while my house was perfectly dry; your Slate Roofing Paint is the best I ever saw.

INDIAN CAMP, GUERNSEY Co., O. Nov. 12, 1884.

JAMES M. JOHNSTON,

Farmer.

Better and cheaper than Shingles.

The roofs of our building are covered with Rubber Roofing and Slate Roofing Paint, we believe we have better and cheaper roofs than if covered with plain shingles.

ROUND BOTTOM, O. Oct. 20, 1884.

JOHN CLEGG Jr., A. M. Mc INTIRE, Farmers.

Three years test—no cracks—no leaks.

We have used your 3 ply Rubber Roofing for three years; and can cheerfully say it has given entire satisfaction, what we laid three years ago looks just as well as when put on, no cracks, or leaks in any place; we think another year will double our business in that line of roofing.

AKKRON, O. Nov. 8, 1884.

VANSICKLE & ALLEN,

Roofers and Roofing Materials.

Better than Tin or Iron—as it will not rust.

Have used your Rubber Roofing, and regard it as a first-class roofing, and believe it to be better than tin or iron, as it will not rust out.

DENNISON, O. Oct. 27, 1884.

G. F. FLEMING,

General Store,

Leaky gutters and roofs.—Three years test.

Have used your Rubber Roofing for three years, and it has given me entire satisfaction. your Paint and Cement I have used on leaky gutters to good purpose.

POWHATAN, O. Nov. 10, 1884.

JOHN RAMSER,

Manufacturer of Copper Distilled Whiskey.

Superior to Tin or Shingles.

I used your Rubber Roofing, and pronounce it superior to shingles or tin; have examined the roofs, and find the laps are cemented together, making one solid roof. The paint and sand makes it fire-proof, I know of nothing better for the purpose.

ASH RIDGE P. O., O. Nov 1, 1884.

SILVANUS PARKER, Trader.

“Lays just where I put it 3 years ago.”

I have not much to say about the Rubber Roofing, only that it lays yet, just as I put it on three years ago, and the Paint sticks well wherever it gets. I would like 25 squares more 3 ply to cover over an old shingle roof.

ARLINGTON O. Nov. 10, 1884.

(Signed)

PETER TRAUTHT,

Ohio Dutch Farmer.

The largest Salt Works in the U. S. endorse Rubber Roofing.

We have used about 30 000 square feet of your 3 ply Rubber Roofing, it has given perfect satisfaction, and we see no reason why it will not continue to do so. The first building to which we applied it, we made a mistake by using oak plank for sheathing, and we found that it warped so as to make the roof uneven; since then we have used hemlock and other soft woods, and it has answered our purpose perfectly; others who have seen it say they will use it in the future. we are now covering a building 200 by 35 for we regard Rubber Roofing and Slate Roofing Paint as the best and cheapest roofing we can use on it.

SALTVILLE VA. Nov., 4, 1884.

HOLSTON SALT & PLASTER CO..

Salt Manufacturers.

(Note.—For the satisfaction of our customers, we would remark here, that the above company have a capital of one million and one hundred thousand dollars.)

Everybody endorses Rubber Roofing.

After using your Rubber Roofing on my own house, and finding it a good and satisfactory roofing, I applied for, and received the agency for its sale in this county; have sold several hundred squares and am authorized to send the following; D. Childers, Pennsboro, W. Va. says, I covered my residence with your Rubber Roofing, it is the best I ever saw: S Musgrove, Pennsboro, W. Va. says, the greatest roofing in the world, and renders the best of satisfaction: J. W. Harris, Pennsboro, W. Va. says, I can cheerfully recommend Rubber Roofing: J. W. Minear, Pennsboro, W. Va. says, I would not use anything but Rubber Roofing: J. Parker, White Oak, W. Va. says, your Rubber Roofing is extra good, cheap durable and fire-proof: C. S. Jackson, Ellenboro, W. Va. says, "the best roofing and cheaper than shingles."

W. TOM MATHERS,

ELLENBORO, W. VA., Nov. 7, 1884.

Job Printer.

As to your Slate Roofing and cement, I can testify that they are the best I have ever used for painting roofs of all kinds, and stopping leaks.

J. C. WELTNER.

STEWARTSTOWN, W. VA., Nov. 3 1884.

Merchant.

Used 18,000 feet "Temporary Rubber Roofing."

I have thoroughly tested your Temporary Rubber Roofing, and find it is exactly as you describe it; a perfectly water proof and sun proof material, and taking into account the rapidity with which it can be applied, the number of years it will last, and the ease with which it can be transferred from one building to another, I can safely say it is the cheapest article of that kind on the market. We used 18,000 feet J. C. FORSYTH, SUPT.,

CAMPS, TELFAIR Co., GA., Oct. 29, 1884.

Georgia Land and Lumber Co.

We have used the Rubber Roofing, and it has been found satisfactory, we prefer it to shingles. Especially on sheds, porticoes &c., where it has to be joined to the body of the house.

CORBETT & COOPER,

CORBETT, N. C. Nov. 5, 1884.

General Store.

I am very glad to say your Rubber Roofing has stood the heat of summer all right, and I think it is the best thing we can use here.

D. E. LOWELL.

LANE PARK, FLA., Oct. 29, 1884.

Real Estate.

No hesitation in recommending Rubber Roofing.

I have sold your Rubber Roofing. It has given general satisfaction to my customers; have no hesitation in recommending it to the Public.

EDWARD R. KNECHT.

KISSIMMEE, FLA., Oct. 29, 1884.

Grain and Building Materials.

Just what you represent them.

In regard to your Rubber Roofing and Paint, would say they are just what you represent them to be, and for my own use prefer them to shingles, or any other roofing.

CITRA, MARION Co., FLA. Nov. 7, 1884.

GEO. K. TAYLOR,

Carpenter, Builder and Fancy Wood Worker.

For Saw-mill and Dwellings—Nothing equals Rubber Roofing even in warm climates.

We used your Rubber Roofing on our mill, and have seen much of it used on dwellings in this section, and believe it to be well suited to this climate; your Slate Roofing Paint gives good satisfaction.

MOYERS & WILSON,

ALTAMONTE, ORANGE Co., FLA., Nov. 3.

Prop. of the Boss Saw and Planing Mills.

Never fails to give satisfaction.

We can freely recommend your Rubber Roofing, it is growing in favor every day in this section, as the number of new buildings covered with it testify; it has never failed to give satisfaction when properly applied.

C. E. REED & BROS.

BARTOW, POLK Co., FLA., Nov. 4, 1884.

Hardware, Sashes, Doors, &c.

Architects' opinion.

We take pleasure in recommending your Rubber Roofing and Slate Roofing Paint as we have used it and find it to be all you claim. We hope all who want a good roof will give it a trial.

TAMPA, FLA., Nov. 1, 1884.

Architects Contractors and Builders.

Orange growers recommend materials to anyone desiring a Cheap and Durable Roof.

We have used Rubber Roofing and Slate Roofing Paint, and would cheerfully recommend them to anyone who wishes a cheap and durable roof.

L. N. WADE & SON,

HIGHLAND GROVE, CRESENT CITY, FLA., Nov. 3, 1884.

Orange Growers.

Rubber Roofing out lasts Tin.—"Coal Tar" cheats in Florida.

Have used your Rubber Roofing and Slate Roofing Paint, and am well pleased with it.

Your 3 ply roofing put on with the same care, will out last tin in this climate, owing to the salt air, and it is also much cheaper; the 2 ply is quite as good as tin, if taken care of same as tin. People here have been cheated with a cheap Tarred Roofing paper, coated with coal tar.

H. CANFIELD,

ST. AUGUSTINE, FLA., Nov. 2, 1884.

Contractor and Builder.

Over an old Shingle roof.

I laid your Rubber Roofing over an old shingle roof, and am well pleased with the result.

JOHN N. ARENDS, P. M.

BREWTON, ALA., Nov. 3, 1884

A shingle manufacturer uses Rubber Roofing on his Boiler Sheds.

We have used your Rubber Roofing, and Slate Roofing Paint on one of our Boiler Sheds 45 by 70 feet, and find them all that you have claimed. We cheerfully recommend their use to those in need of good and substantial covering, for large or small buildings.

JEANETTE, LA., U. S. A. Oct. 27, 1884.

WHITWORTH & CO.,

Manufacturers of Cypress Lumber, Shingles, Flooring and Ceiling.

Prefers Rubber Roofing to shingles.

I used your Rubber Roofing on my new store, and am satisfied with it. I prefer it to shingles, because it is quickest put on and I think more lasting. A. HAENFTLING,

ACCIDENT, GARRETT Co., Md., Nov. 7, 1884.

General Store.

One year ago I used your Rubber Roofing and Slate Roofing Paint, it has given entire satisfaction; and I feel in my duty to recommend them. GEO. T. REED,

STOCKTON, Md. Nov. 5, 1884.

Carpenter and Builder.

Finds it excellent.

Please send me one Bbl. Slate Roofing Paint, same as last, for Painting Tin. I find it excellent. JAMES LAING,

CUMBERLAND, Md., Nov. 1, 1884.

Plumber, Steam and Gas Fitter.

I have had your Rubber Roofing in use two years, and it is as good to-day as when put on. I think it the best Roofing in the market for the money. J. K. S. PENNINGTON,

HAVRE-DE-GRACE, Md., Nov. 1, 1884.

Contractor and Builder.

Experience proves Rubber Roofing preferable to more expensive materials.

With our knowledge and experience with your Rubber Roofing and Slate Roofing Paint, we prefer them to many of the more expensive Roofings.

HARRISBURG, Va., Oct. 27, 1884.

SHOWALTER & THOMAS.

Agricultural Implements.

Not a Single Complaint in over Two Years Sales.

I have been using and selling your Rubber Roofing for over two years, and have not had a single complaint from any of my customers, but all are well pleased with it.

CULPEPPER, Va., Oct. 29, 1884.

C. J. RIXEY,

Wood, Coal and Lumber.

Barn Roofs: nothing equals Rubber Roofing.

We used your Rubber Roofing and Slate Roofing Paint on several large barns, and it has given entire satisfaction. They make a first-class roof, are cheaper and more easily put on than any material we can get in this section. We are building a barn 200 feet long, and will cover it with your Roofing.

SALTILLO, Va., Oct. 31, 1884.

Saltville Stock Farm.

(NOTE.—Palmer & Bowman are proprietors of the largest herd of registered Short-Horn Cattle in the world and are rated financially over one million dollars.)

We are much pleased with your Rubber Roofing, and cheerfully recommend it to the public. A. G. DUNCAN & CO.,

GREEVILLE, Va., Nov. 3, 1884.

Merchants.

Your Rubber Roofing has been on my own building for one year, and I have put it on roofs for others; when put on according to directions, it is all you claim for it.

FARM House, Va. Nov. 8, 1884.

JOHN T. FRY, Lumber Dealer.

Better than any shingles, and why.

Having used your Rubber Roofing and Slate Roofing Paint, I am well pleased with both. They are superior to tin or Iron and better than any shingles we can get in this section, for the following reasons: 1. It does not expand and contract in different temperatures as other roofing does. 2. It is much cheaper. 3. Anyone of ordinary mechanical skill can put it on. 4. It makes a very good roof, in fact, it is the best roof for the money, I ever saw and cheerfully recommend it to all who want a first-class roof for small cost. WM. E. FERRELL.

MALMAISON, Va. Nov. 8, 1884.

Saw mill, Building and Surveying.

Cheaper than shingles or tin.—Slate Paint for Brick walls.

I cheerfully recommend your Rubber Roofing, and think it will in time take place of all other roofing, as it is much cheaper than tin or shingles, and will last longer if kept protected by your Slate Roofing Paint, which article I heartily recommend as a covering not only for Rubber, but over tin, iron, old shingles and brick walls, to keep out the dampness

WILLIAMSBURG, Va. Nov. 8, 1884.

W. H. SWEANY,

General Builder.

A Stock Farmer, with abundance of shingle timber, covers all his buildings with Rubber Roofing.

I have used your Roofing exclusively on all new buildings erected on my stock farm at this place, and it has given entire satisfaction. It is so easily and rapidly applied, requiring no skilled labor, that I find it better and cheaper than shingles, although I have an abundance of shingle timber, and a shingle saw. I am not a native of W. Va., being an invalid naval officer, settled here on account of the excellent climate. I was born and brought up in New York city where I have seen acres of your Roofing used, and so can positively assure the people here of its durability.

CHARLES N. GREENLEAF,

JACKSON Co., W. Va., Oct. 25, 1884.

Stock Farmer.

No reason why it should not last a Generation.

We used your Roofing on our own buildings, and have sold it for use on Mills, Barns, Sheds and Dwelling Houses. It has given entire satisfaction to all parties to whom we have sold. We see no reason why it could not last a generation with proper care and attention.

JACKSON & DYER,

JANE LEW, W. Va., Oct. 27, 1884.

General Merchants.

Read this.

About 10.30 P. M. Oct. 24th, the main machine building of our planing and wagon manufacturing establishment was destroyed by fire, also our circular saw mill 20 by 60, adjacent and attached thereto. The main building was covered with your 3 ply Rubber Roofing, and the saw mill had a shingle roof. The fire broke out in the wood work, back of the chimney in the main building, and did not get into the saw mill until the other building was all ablaze, and yet the fire did not burn through the roof of the main building, (the one covered with Rubber Roofing,) until after the saw mill roof had fallen in, and even the main roof fell in, before the fire broke through the Rubber Roofing, the rafters having burnt off and fell, before the roofing yielded to the flames. We have the utmost confidence in your roofing as to its water and fire-proof qualities.

LINCKLAEN, N. Y. Nov. 4, 1884.

WILCOX & BURDICK,
Wagon-makers Supplies and Manufacturers
of light and heavy wagons.

Institutes recommend Rubber Roofing.

I used your 2 ply Rubber Roofing on a building of this institute about two years ago, it gives me entire satisfaction, and I want more of it.

WHITE PLAINS, N. Y. Nov. 12. 1884.

OLIVER R. WILLIS,

Principal Alexander Institute.

and Military Boarding School,

The parties to whom I sold your Rubber Roofing and Slate Roofing Paint, express themselves as perfectly satisfied, I anticipate an increasing demand for it.

W. W. MILLER.

GARDINER, N. Y. Nov. 1884.

Hardware.

Holstein Stock Farm.—14,000 ft.

Having used 14,00 feet of your Rubber Roofing and 100 gallons Slate Roofing Paint, we can testify as to their good qualities. We'll use large quantities in the spring.

SINCLAIRVILLE, N. Y. Nov. 3, 1884.

B. B. LOID & SON,

Importers and Breeders of Thoroughbred Holstein Cattle.
9,000 feet.

The 9,000 feet Rubber Roofing I used here is given entire satisfaction.

SINCLAIRVILLE, N. Y. Nov. 3, 1884.

MONROE YOUNG,

Carpenter and Builder.

The Roofing you sent us gives good satisfaction, and would recommend it to anyone wanting a cheap roof.

COLLEGE POINT, N. Y. Oct. 25, 1884.

Building Materials.

I have your Rubber Roofing to put on a new church just being built; from what I have seen of the roofing I believe it to be good.

WALDEN N. Y. Nov. 1, 1884.

N. J. FOWLER,

Hardware, Paint and Oils.

Economical roof for Stables.

I have used your Roofing and Paint on stables, and consider them good and economical shall use more.

HEMPSTEAD, L. I. Oct. 28, 1884.

E. NOSTRAND,

Boarding Stable.

Half the cost of Tin.

We have used and sold your Rubber Roofing and Slate Roofing Paint, and find them all you claim. We prefer Rubber to tin, which costs double.

DEXTER, N. Y. Oct. 31, 1884

LEONARD & GILMORE,

Contractors and Builders.

Dwelling.—Would not use any other.—Grainery.

I have used your Rubber Roofing and Slate Roofing Paint, on my Dwelling, Grainery, and Sugar House, would not use anything else as long as I can get them.

SNORT TRACT, N. Y. Nov. 5, 1884.

C. VAN NOSTRAND, Farmer.

A Slate Roofer pleased with Slate Paint.

I have used your Paint and Cement, think them first-class, I am particularly pleased with the Slaae Roofing Paint, and I think it cannot be surpassed as a paint for out buildings.

PALISADES, N. Y. Nov. 10, 1884.

CHARLES L. DU BOIS,

Slate and Tile Roofing.

Slate Roofing Paint.—Saved him a new roof.

I used your Slate Roofing Paint on my roof over one year ago, and it has saved me a new roof.

SMITHPORT, PA. Nov. 4, 1884.

W. F. ORMSBY,

Farmer.

I think your Rubber Roofing and Slate Roofing Paint very good.

ALLENVILLE, PA Nov. 4, 1884.

DAVID PEACHEY, Trader.

I am satisfied with your Rubber Roofing, and so is every one in this section.

DENVER, PA. Nov. 5, 1884.

E. B. WOLF, Furniture and Carpets.

Perfect satisfaction.

Your Rubber Roofing (3 ply) gives me perfect satisfaction, it is all you claim for it.

PORT CHESTER, N. Y. Nov. 10, 1884.

I. RADECHE, Farmer.

House Paints and Roofing satisfactory in every respect.

We have sold your Rubber Roofing and Paints, and are pleased to say they have given satisfaction in every respect.

BERLIN, N. Y. Nov. 6, 1884.

SHELDON & HULL,

Hardware and Lumber.

Keeps out the cold.

We have used your materials on our buildings for keeping out the Cold; consider them all you claim.

UNION SPRING, N. Y. Nov. 3, 1884

H. S. ANDERSON,

Cayuga Lake Nurseries.

Just what is needed.

We used 30 squares your Rubber Roofing, and find it giving good satisfaction, your Slate Roofing Paint seems to be just what is needed. **KNEPPER BROS.,**
SOMERSET, PA. Oct. 31, 1884. Ins. Agents'

Coal Miners endorse Rubber Roofing.

The use of other materials and coating has been a continual annoyance to us, but we find in your Paint and Cement all that we wish for, and we are pleased to subscribe to the same.

SHICKSHINNY, PA. Nov. 1, 1884.

SALEM COAL COMPANY,

Miners and Shippers of Wyoming Anthracite Coal.

Used several hundred squares on flat and steep roofs.

I have used several hundred squares of Rubber Roofing (in most 3 ply) put on roofs steep and flat, all over this section of country, it has given perfect satisfaction. My business is roofing in general, wherever I do one job in a town, it is sure to bring me many more. I recommend it to all my friends, for I believe in your roofing, although I could make more money using Tar roofing which has been tried and proved a failure. **WM. BELL,**

PITTSBURG, PA. Oct. 25, 1884.

Roofer.

A Painters opinion.

I heartily endorse the good qualities of your Paint and Rubber Roofing; have used your paint on tin roofs and wood fences, and find it to come up to all you claim for it.

CUSETNUT HILL, PA. Oct. 30, 1884.

HENRY AUGE, Painter.

The Rubber Roofing and Slate Paint is giving good satisfaction, we have Shingles, Slate Tin and Iron roofs in our neighborhood, but like your Rubber the best.

MINES, BLAIR CO., PA. Nov. 13, 1884.

W. C. EASTEP, Carpenter.

Carpenter 20 years.—His opinion.

I think your Rubber Roofing good and cheap, have used both 2 and 3 ply; think 3 ply cheapest and best for the price, the Paint and Cement works very well. My first roof has been on one year, and has given satisfaction. I am a Carpenter and have followed the business for twenty years, and have a knowledge whereof I speak.

J. L. COLGIN,

Carpenter.

FOXBOROUGH, PA. Nov. 14, 1884.

The admiration of all.

I have used your Rubber Roofing with satisfaction, it is the admiration of all. **N. HENRY, Builder.**
BUTLER, PA. Nov. 15, 1884.

Hotel proprietor endorses Rubber Roofing.

I have used your Roofing Materials, and am well pleased with them. **FRANK AMSTALDEN,**
LACKAWAXEN, PA. Nov. 12, 1884.

Union Hotel.

Superior to Tin.

A very pretty roof

The universal opinion of Builders.

I am pleased with your Rubber Roofing and Slate Paint, it is superior to tin and iron for many important reasons. 1. It does not expand and contract with heat and cold, like other roofing, it is cheaper; anyone can put it on, and lastly, it makes a very pretty roof.

LEEECHBURG, PA. August 27, 1884

CHARLES S. LYNN, Builder.

Blacksmith building —“ Best in the market.”

I have used your Rubber Roofing, and am much pleased with it, think it best roofing for the money in the market.

JAMES K. JONES,

NORTH SEWICKLEY, BEAVER CO., PA. Nov. 7, 1884.

General Blacksmith.

I have used your Rubber Roofing, and am well pleased with it, for it does not expand and contract with heat or cold as metal roofs do, is more easily and quickly put on, and cheaper.

A. J. YOUNG,

RICES LANDING, PA. Nov. 3, 1884.

Farmer and Stock Raiser.

Your Rubber Roofing is on my buildings. I am recommending it to my neighbors for I think it is a good roofing.

I. C. SCHRECKENGOST,

PITNEYVILLE, PA. Nov. 3, 1884.

Farmer.

Your Rubber Roofing was put on the coach manufactory of J. G. Reed, and has given good satisfaction. We shall use the same materials on our warehouse now building.

POTTSGROVE, PA. Oct. 29, 1884.

T. J. BIEBER & CO., General Store.

I am pleased to say your Rubber Roofing and Slate Roofing Paint is giving great satisfaction in this section.

WM. CRISWELL,

MURDOCKSVILLE, PA. Nov. 4, 1884.

Carpenter and Wheelwright.

We have used your Rubber Roofing, and think it is the best roofing of that kind we have ever seen.

PECK BROTHERS,

PECKVILLE, PA. Nov. 4, 1884.

Builders Materials.

Cheap and good.

I have used your Roofing and Paint. I like them and think them cheap and good.

GUM TREE, CHESTER CO., PA. Nov. 17, 1884.

D. Y. WILSON, Justice of the Peace.

A Farmers' opinion.

The 80 squares Rubber Roofing and Slate Roofing Paint I had of you, gives the best of satisfaction, I think them cheap and durable.

ROBT. MOORE, Farmer.

Iron Roof: could have saved \$125 and much labor.

My building was Roofed with Iron which was worthless in two years, one year ago I removed the Iron and put on your 2 ply Rubber Roofing; in putting on the roofing we had very bad weather, and I could not get the Roof Painted all over and it stood that way all winter without leaking; this spring I finished the first coat Paint, and in Sept. gave it the second coat. Paint and Sand, and now it is as solid as Iron, and seems to me will stand five or six years; my Store Room is used for Drugs and Hardware, and above is the A. O. U. W. Hall. I will have some of my other buildings covered soon, for Rubber Roofing is cheaper than Iron or Shingles, had I covered my house with it, I would have saved not less than \$125 and a great deal of labor.

EDWARD HEINZ,

AVENZVILLE, ILLS. Nov. 23, 1884.

Real Estate Owner.

Shingles old and bad.—Slate Paint sheds water like a duck's back.

I repaired two houses, two sheds and one barn, last summer on my home place here. I used one bbl. your Slate Roofing Paint; the shingles were old and bad, your Paint seems to stick like Glue, and sheds water like a duck's back. Everybody, workmen and all, remonstrated against some of the old roofs as not worth repairing, but I was determined to see what the "critter" would do, so as to know for the rest of my roofs. I varied the experiment on different roofs and kept record of the facts; I have strong faith that it will not only do well but last well.

J. B. TURNER,

JACKSONVILLE, ILLS. Nov. 16, 1884.

Farmer.

Employed a careless workman.

Used your Rubber Roofing last spring, I think it would have proved first-class, but the one that put it on did not understand his work, so did not do as well as it ought to have done, still I am satisfied.

JOHN C. FISSEURAT,

TREMONT, ILLS. Nov. 15, 1884.

Hardware, Stoves, &c.

NOTE.—It is important that the party who lays our materials, reads carefully and understandingly our directions for applying. If the directions are followed certain satisfaction will result.

Saves many times its cost.

We have used your Slate Roofing Paint, and can safely recommend it as a first-class article for the purpose. It works admirably for repairing leaky roofs, and will save many times its cost for anyone having damaged roofs.

A. WHITE & CO.,

GENESEO, ILLS. Nov. 15, 1884.

Manf's. of White's Improved Roller and Skates, Hardware, Stoves, &c.

Your Rubber Roofing is on one of my buildings, and am much pleased with it; have sold several lots of your Roofing Paint to parties repairing old roofs; all like it.

MELVIN, ILLS. Nov. 17, 1884.

L. S. HEATH, Hardware, &c.

Flat roof that gave considerable trouble.

I used your Roofing Materials on a flat roof that had given me considerable trouble, and am well pleased with it. For on a flat roof where you do not care to go to the expense of Tin or Iron, I think it a good, cheap and convenient material.

L. S. BURNAP,

WESTFIELD, ILLS. Nov. 19 1884.

Dealer in Real Estate.

New Shingle Roof that leaked like a Sieve.

I covered a flat roof with shingle and it leaked like a sieve;—I then laid Rubber Roofing over the shingles, and it has never since then let one drop of water through, even the dew drips off without being absorbed; I see no reason why it should be less durable than a sheet of Slate, and can truly recommend Rubber Roofing and Paint.

E. H. FERRIS,

CHAMPAIGN, ILLS. Dec. 1 1884.

A nice, good and cheap Roof.

My opinion about Rubber Roofing is in your favor, I have used it two years, and it has answered all right for turning water. It is more fire-proof than shingles, and I believe if a good coat of paint and sand is kept on, there is no wearing out. It is a nice, good and cheap roof.

J. KRIEBEL, Farmer

REDDICK, ILLS. Nov. 25, 1884.

Only one coat of Paint and as good as Tin.

It answers better than I expected; it pleased me so well I have discarded all other kinds. 18 months ago I applied Rubber Roofing, gave it only one coat of Paint, and it holds out as good as any Tin roof, and better than Shingles. It is the best roofing manufactured, and will have a great future.

PH. ROHMAN,

PEORIA, ILLS. Dec. 6, 1884.

Fruit Grower.

Roofers experience.=Nothing equals Slate Paint.

I have been in the Roofing business about four years, and have never found any paint that would equal Slate Paint. I can give the best of satisfaction by its use.

JACKSONVILLE, ILLS. Nov. 30, 1884.

C. McEVERS, Roofer.

An attractive Roof.—Improves the Building.

Your Roofing gives me entire satisfaction, both in utility and beauty. I do not doubt but it will prove equally satisfactory in durability. Passers by are attracted by it, and frequently make inquiries. I shall use no other hereafter.

S. SWINGLE,

STEWARSON, ILLS. Nov. 24, 1884.

Farmer and Builder.

I am well pleased with my roof; from its appearance I can't but think it will out last any Shingle roof; everybody that sees it speaks in its favor.

F. F. BADOURG,

BEAVER CREEK, ILLS. Dec. 3, 1884.

Farmer.

No wind, snow or rain ever gets through it.

Your Rubber Roofing, makes a splendid Roof, and it is so easy to put on. I used it on a Flat roof; no wind, rain or snow ever gets through. It goes ahead of Pine Shingles or Tin, and is much cheaper.

IRIAM OBERLIN, J. P.

PLEASANT LAKE, IND. Nov. 24, 1884.

Freezing, Thawing and Drought have no effect on Rubber Roofing.

I laid a quantity of your Rubber Roofing in the spring of 1883, the winter of 83 and 84 with us was very severe on that class of Roofing, thawing and freezing. The past summer has been very dry, these extremes in temperature are usually fatal to that class of roofing, but since receiving your circular of Oct. 15th., I have made a careful examination of the roofs, and find them as perfect as when first laid. I shall not hesitate to use it in the future, and shall recommend it to others.

REUBEN GARDNER,

ANDREWS, IND. Nov. 20, 1884.

Proprietor of Andrews Planing Mill.

The advantage over Tin or Shingles.

I have used your 2-ply Rubber Roofing, and it gives perfect satisfaction. I believe it will be durable, besides the advantage over Tin and Shingles, in the ease and rapidity by which it is laid.

N. E. TINKHAM,

KNOX, IND. Nov. 18, 1883.

Sewing Machines and Lumber.

Less trouble than with Tin or Slate they lay.

We used quite an amount of your Rubber Roofing and Slate Paint in 1883, have not a single leak; consider it the most speedy roof laid, and very durable. We do Slate and Tin Roofing, and have less trouble with your Rubber and Slate Paint Roofs than anyone we put on.

KNIGHT & CRIDER,

GREENFIELD, IND. Nov. 17, 1884.

Stoves, Tinware &c.

Better than his Iron roofs.

My main Building is Roofed with Iron, but out buildings have been covered with your Rubber Roofing for some time, which give me much better satisfaction.

NEWVILLE, IND. Nov. 16, 1884.

S. H. BARTLETT,

Ins. and Collecting Agency.

Frost has no effect on Rubber Roofing.

I have used your Rubber Roofing, Slate Paint and Cement, and sold to others; in all cases they have given the best of satisfaction. Those who have used them say they are superior to tin or metal. Frost does not effect them, and the Paint will not peel off. The time is near when they will take the lead of all Roofing.

J. P. SINER,

SHELBY, IND. Nov. 17, 1884.

Hardware, Stoves, &c

Your Rubber Roofing is on my building, and is also applied to others in this town. We are all well pleased with it.

J. B. WILLIAMS,

RAGLEVILLE, IND. Nov. 13, 1884.

Carpenter.

6 inch fall in 23 feet.—Splendid satisfaction.

We are using your Rubber Roofing and Paints, and think they are the best articles we have ever tried, especially on flat roofs; we are using them on Roofs 6 inches fall in 23 feet, and they give splendid satisfaction.

SHAFFER & RINGLE,

LA RAY, IND. Nov. 17, 1884.

Builder.

Sharp fire test.—Rubber Roofing saves a Brick Building.

I have used your Rubber Roofing for three years, and find no fault with it. If put on dry sheathing, and well painted, it surely makes a good roof, and as fire-proof as can be. I had one test of its fire-proof qualities; I covered one Roof with your Rubber and Slate Paint, the next building to it was covered with shingles, this caught fire and burnt down, and it would have been impossible to have saved the other building had it not been covered with Rubber Roofing and Slate Paint, both buildings were brick.

E. B. OSBORN,

VEEDERSBURG, IND. Nov. 19, 1884.

Builder and Lumber.

An experienced Carpenters' opinion.—The best roof he ever saw.

I am 56 years old, call my self a first-class Carpenter, and have a general knowledge of building material of all kind; my opinion is your 3 ply Rubber Roofing, covered with two coats Slate Roofing Paint, the last coat sanded, makes the best roof I ever saw; hundreds of men come to see the roofs I have put on, and like them.

J. H. WILLIAMS,

GUERNSEY, WHITE Co., IND. Nov. 3, 1884.

Carpenter.

Regrets he did not use Rubber Roofing in the first place.

I applied the Rubber Roofing, and am entirely satisfied that I have the best roof that I could have put on. I regret that I did not use this roof in the first place.

JACKSON, IND. Oct. 28, 1884.

E. C. ELLIOT, General Merchandise.

I have used your Rubber Roofing two years, and it is all right.

T. B. PEUGH, Farmer.

SALEM, IND. Nov. 21, 1884.

Fully as represented.—Two years trial.

Had your Roofing in use over two years, gives entire satisfaction, and is fully as represented.

A. HEINE, Supt. CHAS. HOFFERBERTH Works,

EVANSVILLE, IND. and NEW YORK CITY, Nov. 22, 1884. Walnut Lumber, Logs & Staves.

Architects' experience.—Best paint he ever used.

After a fair trial I consider your Slate Roofing Paint, the best Paint I have ever used.

CANNELTON, IND. Nov. 21, 1884.

B. H. ROUNDS, Architect and Builder.

Flat Shingle roof.

I have used your two ply Rubber Roofing and Slate Roofing Paint for two years over a very flat shingle roof that leaked badly—it gives entire satisfaction, and feel safe in recommending them as cheap and durable.

J. P. HOLMES, Farmer.

GLENWOOD, IND. Nov. 17, 1884.

Experienced Tinner's opinion.

We can say in regard to your Rubber Roofing and Slate Roofing Paint that they are excellent, and all you claim for them. The writer had a great deal of experience in Eastern states with roofs, and has laid a great many squares of Tin roofs, and truly believes that Rubber Roofing will out last Tin, if it has the same attention tin absolutely requires.

SHOSHONE, IDAHO, Nov. 18, 1884.

WERNICKE & CO.,

Hardware, Stoves, &c.

Cheaper than any other reliable Roofing.

I have used your Rubber Roofing; it has given general satisfaction, I believe it is a good material for Roofing: easy to put on, and cheaper than any other Roofing I have handled.

NELIGH, NEB. Nov. 6, 1884.

I. N. MILLS,

Building Materials, Lumber, &c.

Sides and Roof of Warehouse covered with Rubber Roofing.

In handling your Roofing Materials in this state for the last two years, I have found them to give entire satisfaction, and in every sale made, to have fully met the practical use required of them; on my warehouses I have lately used 4,000 feet of the 3-ply, covering sides and roof, and can unhesitatingly recommend the materials.

C. F. GOODMAN,

Wholesale Druggist

OMAHA, NEB. Oct. 29, 1884.

Will last a life-time.

We are well pleased with your Rubber Roofing, and think with you, if taken care of, it will last a life-time.

J. BRINSDON & BROTHER,

BATTLE MOUNTAIN, Nev. 21, 1884.

Contractors.

A trying climate for Rubber Roofing.

We have been using your 3-ply Rubber Roofing for two years, on flat and pitch roofs, it is far superior to shingles; have just taken a contract to build a brick school house, and are going to use your 3-ply on the roof; your Slate Cement used around chimneys is making a good record.

WILLIAMS & McHENRY,

FARMINGTON, NEW MEXICO, Nov. 7, 1884

Millers and Builders.

Nothing better made.

Your Roofing and Paint are the finest for repairing old buildings, or use on new roofs of any kind, and would recommend to all who desire anything of that kind; there is nothing better made.

W. B. SKINNER,

MILES CITY, MONTANA, Nov. 25, 1884.

General Mdse. and Ranch Supplies.

We have been selling to the trade here your Rubber Roofing and Slate Roofing Paint; in every sale made, find it has given entire satisfaction.

J. F. SMITH & BRO.

65 Strand, and 59, 61, 65 & 67 Mechanic St.,

GALVESTON, TEXAS, Nov. 4, 1884.

Manfs. of and dealers in Doors, Blinds, Sash, Builders Hardware, &c.

A Texas stock farmer's opinion.

Your Rubber Roofing has been on our roofs for two years, and gives perfect satisfaction. Would not change it for anything we know of.

J. L. DEWEY,

SEALY, TEXAS, Nov. 2, 1884.

Stock Farm.

We can cheefully recommend your "Rubber Roofing" to be all, or even more, than you claimed and in every instance it has proved entirely satisfactory; to your Slate Roofing, Paint, (we have been selling paints for the last 12 years,) we can consistently say that your paint, is the only paint, we have sold that gives complete satisfaction in every respect. Will send you soon a large order for both paint and roofing.

J. H. CHOICE,

WHITESBORO, TEXAS, Nov. 1, 1884.

Hardware.

Slate Cement.

I have used on my tin Roof your Cement for stopping leaks, also your Slate Roofing Paint for painting same, and take pleasure in saying both give satisfaction.

LONGVIEW, TEXAS, Oct. 29, 1884.

J. W. BORING,

General Store.

House Paint.

I have used your house Paints, and like them. I also hear your Rubber Roofing spoken of very highly.

J. K. GILL,

SHERMAN, TEXAS, Oct. 31, 1884.

Contractor and Builder.

As good to-day as when applied.

Your Rubber Roofing and Slate Roofing Paint has been on my building two years, and look as well to-day as when put on, I think well of your materials.

W.M. STEIN,

NEW BERLIN, TEXAS, Nov. 13, 1884.

Ginner and Miller.

It is a good Roofing.

Your Rubber Roofing is on our buildings, and our opinion is that it is a good roofing. CANTON, TEXAS, Nov. 11, 1884.

YOUNGBLOOD BROS.,

Saddle and Harness Makers.

A Farmers' advice.—How to keep out snow and rain.

I would advise all who want a good roof, that will keep out snow and rain, to use your Rubber Roofing, for it is the best and cheapest.

L. A. MANGUM,

EASTLAND CITY, TEXAS, Nov. 14, 1884.

Farmer.

Texas climate.—Slate Paint on shingles.

I covered two houses with your Rubber Roofing and Slate Roofing Paint last December, it stood through the winter, and has been thoroughly tested by the summer sun. I cheerfully recommend you materials for use in this climate. Your Slate Roofing Paint has stopped the leaks in my shingle roof.

D. H. LORING, P. M.

MASON, TEXAS, Nov. 11, 1884.

Has not leaked a Drop.

I used your 2-ply Roofing on a very flat Roof, since which time it has not leaked a drop.

LAWRENCEVILLE, N. Y. Dec. 1, 1884.

W. T. BELLOWS, Farmer.

Our other roofings cost twice as much, and do not equal yours.

We have one roof covered with your Rubber Roofing and Paint. It has been on about two years, and is just as good now, as the day we put it on, we have several different kinds of roofing, but none of them are equal to yours, and they all cost twice as much.

YONKERS, N. Y. Nov. 13, 1884.

JOHN K. FLEMING & SONS,

Wool Extracts,

The Rubber Roofing has stood well during the summer, if it stands as well in the winter, it will find a large sale here another season.

W. M. SMITH,

Farmer.

ALEXANDER, N. Y. Nov. 17, 1884.

Removes Tin and applies Rubber Roofing.

Most of my buildings have your Rubber Roofing and Paint on; I wish they all had, as I cannot speak too highly of it. I think so well of it, I am going to take off a Tin roof (that I have to paint every year to keep from leaking) and put on Rubber Roofing.

NEW HYDE PARK, L. I., N. Y. Nov. 12, 1884.

A. C. CORNWELL, Farmer.

Lives on a hill and gets all the heavy winds.

I am living on a hill, getting all the heavy winds, but find in the time I have used your Rubber Roofing (with battings on,) it has stood the test, I believe it is the cheapest and best.

HICKSVILLE, L. I., N. Y. Nov. 24, 1884

D. S. STEINECKE, Farmer.

A Blacksmith's test.—Better than Tin.

I am well pleased with your Rubber Roofing, consider it better than wood or tin. The Slate Roofing Paint is the best for tin I have ever tried.

WM. H. SMITH,

ROSLYN, L. I., N. Y. Nov. 19, 1884.

Blacksmith.

Knows from experience that it is good.

I have used your Rubber Roofing for two years, it makes a good looking and water tight roof, which are very essential points in roofing, I would heartily recommend it for roofs of all kinds, knowing from experience that it is good.

JOHN H. BLAUVELT,

NAUET, N. Y. Nov. 20, 1884.

Farmer.

As hard as Slate.

It is nearly two years since we put on your Rubber Roofing. It has given good satisfaction, and promises to be enduring; the roof is about as hard as Slate.

CLIFTON, N. Y. Nov. 18, 1884

GRIEVE'S NURSERY CO., Rochester, N. Y.

Sends money for more goods.

I have used your Rubber Roofing and Slate Paint, and find them entirely satisfactory in confirmation thereof, I send you \$25 money order, for more of the same.

DOVER, N. J., Nov. 20, 1884

JOHN E. VAIL, Merchant.

The longer it is on—the harder it gets.

I like your Rubber Roofing and Slate Roofing Paint first rate, think it is cheapest and durable; the longer it is on the firmer it gets.

J. J. HEBLER, Farmer.

NEWTON, N. J. Nov. 24, 1884.

House Paints—why he has large sales.

My customers say your House Paints are as good as any other, and much cheaper, for this reason they find a ready sale.

G. M. LANNING,

AFTON, N. J. Oct. 24, 1884.

General Store.

Equal to Tin.

Your Rubber Roofing is giving great satisfaction in this section, I believe if well put on and taken care of, it is equal to tin, which costs double.

D. H. VELTMAN,

SPRING LAKE, N. J. Nov. 3, 1884

Carpenter and Builder.

Intense heat—Rubber Roofing on a Japan factory.

We have your Rubber Roofing on our Japanning Factory, which is a severe test on account of the great heat, and find it satisfactory in every respect.

NEWARK, N. J. Oct. 30, 1884.

The Rudden Manufacturing Co.,

Japan Leather.

A cheap and satisfactory Roof.

The materials purchased from you seem well adapted to the purpose for which they are recommended, they make a cheap and satisfactory roof, easily and quickly applied by any one. We have no reason to doubt its durability.

N. & E. H. WELLS,

MESUHOPPEN, Pa. Nov. 19, 1884.

Druggists,

Poultry Breeders.—Three years test.

I have used your Rubber Roofing and Slate Roofing Paint three years, and can strongly recommend them as being superior to any other kind of a roof. I was examining them yesterday, and found them as good as when put on three years ago; as for siding up poultry houses or other buildings, it has no equal.

J. F. FLETCHER,

WEST MONTEREY, Pa. Nov. 17, 1884.

Breeder of highest class Poultry, Bees and Swine

Over old shingles.

Your Rubber Roofing was used over old shingles, and answers a good purpose, it will take the lead of shingles or tin.

JACOB LINHART, Farmer.

MAYTOWN, Pa. Nov. 21, 1884.

Poultry houses.=Warm and free from Vermin.

We have covered our Poultry house with your Rnbber Roofing, and lined it with your Tarred Sheathing Paper, and are satisfied they are jnst the thing. The Poultry house is warm and the Tarred Paper is sure death to chicken lice, as we have not been troubled with that worst of pests since. As fast as our old roofs give out we shall be sure to use your Rubber Roofing, for it gives us entire satisfaction.

GEO. S. SINGER & SON,

CARDINGTON, O. Nov. 24, 1884.

Coal, Ice and Poultry

"6 feet fall in 65 ft. "-a very flat roof.

The 35 squares of 3-ply I had of you was put on my Fish-house, six feet fall in sixty-five feet, it look neat, every one admires it, and I think it will last a life time if painted as often as Tin should be

A. J. GUSTAVIUS,

HURON, ERIE Co., O. Oct. 29, 1884.

Fresh and Salt Fish.

Temporary Rnbber Roofing.

I have used your Temporary Rubber Roofing, and think it the cheapest and best I ever used.

H. J. PENHART,

WOODSFIELD, O. Nov. 1884.

Lumber.

Stands the Cold all right.

The Rubber Roofing I hav of you two years ago seems to be all right, it stood the Cold winter very well.

JOHN KENNEDY,

WHEELERSBURG O. Nov. 17, 1884.

Farnier.

I was formerly a Carpenter, left the trade, and am now a country merchant, I and my son put on your Rubber Roofing and it does well.

P. W. WISMAN,

TINGER, O. Nov. 18, 1884.

General Store.

Painter's opinion.—Slate Paint the Best.

I cheerfully recommend your Slate Paint as the best, and most durable I have ever used for the purpose.

J. W. GANDER,

Six Points P. O., O. Nov. 22, 1884.

Painter.

The Best he ever used.

I have used your Rubber Roofing and Slate Roofing Paint, and believe them to be the best roofing materials, considering the cost, I have ever tried.

PATTON'S MILL, O. Nov. 18, 1884.

JOHN SEAMANN, Miller.

On Tin.=Slate Paint excels all others.

Your Rubber Roofing is just the thing for new roofs, and your Slate Roofing Paint for Tin Roofs excels all other Paints in use.

G. W. NOBLE, M. D.

EDONS, WMS Co., O. Nov. 18, 1884.

Better than Tin or anything else.

As long as I can get Rubber Roofing, I will use no other for my roofs, for it is better than tin or anything else I have come across, any one who wants to know more about it, let them write me.

MCARTHUR, O. Nov. 19, 1884.

PHARES MATTES,

Gardener and Florist.

Will use no other.

Your Rubber Roofing and Slate Roofing Paint gives good satisfaction, I will use no other in future.

HENRY ZIEBER,

BELLEVUE, O. Nov. 18, 1884.

Farmer.

100,000 feet.—The Leading Roofing.

We have handled about 1,000 squares of your Rubber Roofing, and it is giving good satisfaction, we believe it is to be the leading roofing, as soon as the people become acquainted with its merits

PALMER & HULL,

WAUSEON, O. Nov. 19, 1884.

General Merchants, Building Materials, &c.

We have only used your Slate Roofing Paint, that we like so far as we can judge from trial made.

MEANS, KYLE & CO.,

HANGING Rock, O. Nov. 15, 1884.

Coal Miners and Farmers

One year ago I gave your Rubber Roofing a trial and like it, please send me five squares more.

C. A. MARBLE,

WILMINGTON, O. Nov. 13, 1884.

Undertaker.

Always has the Preference.

Your Rubber Roofing has given such satisfaction that it alwyas has the preference when we have a roof to repair or lay new.

ELBEL, GILLIAM & CO.,

CANTON, O. Nov. 13, 1884.

Manuf. of Saddlery, Hardware, Malleable Iron Castings &c.

"It is all right."

I have tried your Rubber Roofing, and find it as recommended, and can readily say it is all right.

S. S. ALBIN, General Store,

SILVERLY, O. Oct. 28, 1884.

Your Rubber Roofing is giving me satisfaction, it looks as though it might be durable.

WEST CARLISLE, O. Nov. 7, 1884

WM. H. DIVAN, Farmer.

Two years test.—As good as new.

I used your Rubber Roofing on my building two years ago, it looks as well now as when first put on.

ISAAC HILTY,

PANDORA, O. Nov. 5, 1884.

Cider Mill.

Far ahead of Shingles.

Have used your 3-ply Rubber Roofing and Slate Paint, and find them first-class, far ahead of shingles and much cheaper.

LENOY EARL,

RISING SUN, O. Nov. 4, 1884.

General Agent.

A point worth careful consideration.

I have had numerous inquiries as to how your Rubber Roofing stands the hard freezing rain, snow &c; mine was put on in 1882, and last winter was a fearful cold one, even for this cold country, and living on the shores of Lake Superior we have lots of rain and snow. My Roof looks as well and I have every reason to believe, is as good to-day, as the day it was put on, and the sand makes it fire-proof against sparks, which is a point worth careful consideration. If I use any more Roofing, I shall most certainly use yours. J. W. SEIGHMAN,

EAGLE RIVER, Mich. June 15, 1884.

Painter.

Slate Paint for leaky Roofs.

I have no hesitation in saying your Rubber Roofing and Slate Paint are "just the thing." They give good satisfaction, and are easily put on. The Slate Paint is excellent for leaky Roofs, and in fact for new Shingles, is far superior to any paint I ever used.

WILLIAMSTON, Mich. Dec. 12, 1884.

H. E. HIGBEE,
Contractor and Builder.

A 1 satisfaction.

I have used your Rubber Roofing and Slate Paint on my new house, and have sold it to others. It has given A 1 satisfaction.

UTICA, Mich. Nov. 19, 1884.

A. WAGNER,
Hardware, Stoves, &c.

What old Painters say about Slate Paint.

I have used a number of bbls. your Slate Roofing Paint, and find it all you claim for it. I have compared it with other Roofing Paints, and do not find any that will wear, and look one quarter as well. Old Painters say that it beats any roof Paint they ever saw; they try to imitate it, but they can't.

SWARTZ CREEK, Mich. Nov. 17, 1884.

A. PHILPOTT,
Roofing Materials, Paint &c.

Shingles fail.—Never saw a drop of water penetrate Rubber Roofing.

I built my house two years ago, there was a piece of the Roof that was rather flat, and could not keep it dry with the best of Shingles; saw your circular and sent for your Rubber and Paint, and have never seen a drop of water come through it yet, and I do not think there will be in years to come. It is the best thing I ever put on a Roof, and heartily recommend it.

GANGES, Mich. Nov. 18, 1884.

WM. CORNER,
Proprietor Spring Hill Farm.

Four years trial.

My Flat Roof buildings covered with your 2-ply Rubber Roofing four years ago, are as well protected now as when first applied, and it affords me pleasure to say your materials give me entire satisfaction.

ADDISON, Mich. Nov. 12, 1884.

A. J. KEMPTON,
Watch Maker and Jeweler.

A severe fire test.—Rubber Roofing vs. Gravel Roofing.

In answer to your inquiry as to how your Rubber Roofing stood the test in the fire which partly consumed our Refrigerator, would say that the portion covered with Tar and Gravel was completely destroyed, but the part covered with your Rubber Roofing did not burn, although the boards under it were completely charred. We consider your Roofing perfectly fire-proof.

FLINT, Mich. Nov. 3, 1884.

Wholesale dealers in Butter, Meats and Tropical Fruits.

Always very satisfactory.

We have used your Rubber Roofing and Slate Paint for about 3 years, and have always found them very satisfactory, and take pleasure in recommending them.

ST. LOUIS, Mich. Nov. 11, 1884.

RICHARDS, ALTHOUSE & CO.,

Staves, Heading and Hoops.

Your Slate Roofing Paint has given me the best of satisfaction. Send me $\frac{1}{2}$ bbl. more.

SEBEWAING, Mich. Oct. 30, 1884.

CHARLES HENNING, Doors, Sash and Blinds.

First-class articles.

My opinion is that your Rubber Roofing and Slate Roofing Paint are first-class articles, and I don't see why the Rubber will not last a life-time, if Painted every few years. I used 15 squares your 2-ply.

EAST SAGINAW, Mich. Oct. 30, 1884.

JAMES MAGUIRE,

Trader.

Old Shingles.—As good as new.—When given a coat of Slate Paint.

I take great pleasure in recommending your Slate Roofing; it is just what is wanted to preserve new Shingles, and for old Shingles there is none superior: it fills the cracks completely, making the Roof as good as new. Your Rubber Roofing is also an excellent article.

SEBEWAING, Mich. Nov. 7, 1884.

CHARLES HENNING,

Sash, Doors and Blinds.

Store Roof.—The best of satisfaction.

I used your Rubber Roofing and Slate Roofing Paint on a large store, and the Roof has given the best of satisfaction.

IONIA, Mich. Nov. 4, 1884.

C. ALLEN,
Architect and Builder.

Five years experience.

I have used and sold several hundred squares your Rubber Roofing in the last five years, and find it gives great satisfaction in this cold country, I have 1,800 feet on my own building

SAND BEACH, Mich. Oct. 31, 1884.

WALTER A. SMITH,

Stoves and Tinware.

On their own store.

Our store building is covered with your Rubber Roofing; we are satisfied it is all you claim and think it will be the roofing mostly used eventually. We recommend it every time.

HAWK & STRONG.

WILKESVILLE, O. Nov. 25, 1884.

Manfs. of Doors, Sash &c.

Two years trial.

I have used your Rubber Roofing for two years, and covered many buildings with it. I find it is first-class, and gives the best of satisfaction in every respect. H. W. COCHRAN, MT. VERNON, O. Dec. 1, 1884.

Carpenter and Builder.

It is strong enough.

I am glad to testify to the excellent qualities of your 3-ply Roofing; it has given entire satisfaction and I recommend it to all who wish a good, durable and fire-proof roof. It does not effect the water for domestic purposes, if directions are followed. P. D. WILLIAMS, HAZAEL, O. Nov. 24, 1884.

Contractor and Builder.

P. S.—If you wish to make my testimonial any stronger, do so, for I am well pleased with Rubber Roofing and Slate Paint.

Farmers in Knox County.

Rubber Roofing is all you represent it, one-third cheaper than pine shingles, and I am satisfied will last longer than the best Shingle Roof. My Roof has stood the test, so we are perfectly satisfied. Rubber Roofing is being extensively used among the Farmers in Knox Co., (as well as other places,) and they are men that know what is good and cheap, to keep the cold, snow or rain out, and make a good roof in general. WM. W. SOCKMAN,

MILTON CENTRE, O. Dec. 5, 1884.

Lumber.

I have used your Rubber Roofing and Slate Roofing Paint, and find it gives good satisfaction. H. BRINKMAN,

Farmer and Builder.

KALIDA, O. Dec. 12, 1884.

I have used your Roofing; and when properly put on is as good a roof as can be made.

RUSSELL, O. Nov. 25 1884.

D. W. MCCOY, Carpenter.

One coat of Slate Paint equal to three of any other.

Your Roofing has given the best of satisfaction and makes a durable roof; the Slate Paint with which it is covered is the best Paint I ever used; one coat is equal to three of ordinary Paint.

A. J. MCINTIRE,

ROUND BOTTOM, O. Dec. 1, 1884.

Carpenter.

He knows by Experience.

I believe the Rubber Roofing to be the Best for all purposes, that is now in use; and as for your Slate Paint, it can't be beat for a roof Paint. E. E. McGREW,

MILNERSVILLE, O. Nov. 24, 1884.

Roofing and Painter.

Doctors recommend Rubber Roofing.

I have used your Rubber Roofing, and am well pleased with it.

SOMERSET, KY. Nov. 7, 1884.

J. L. OWENS, M. D.

Your Roofing gives entire satisfaction.

HARTFORT, KY. Oct. 28, 1884.

WILLIAMS BROS.,

Hardware, Stoves, &c.

His customers all satisfied.

I would say I have used your 2 and 3-ply Rubber Roofing, and like them very much, for they give satisfaction to my customers.

W. L. MCADAMS,

HAWSVILLE, KY. Nov. 18, 1884.

Painter and Roofing.

A number of years' test.

I have used your Rubber Roofing and Slate Roofing Paint for a number of years, and they have given me good satisfaction.

W. W. ALCOKE,

CORINTH, KY. Nov. 17, 1884.

Sash, Doors, Lumber &c.

I feel safe in recommending your Rubber Roofing and Slate Paint as cheap and durable

ASA B. NICKELL,

I am pleased with them.

EZEL, KY. Nov. 17, 1884.

Farmer.

Slate Paint the best for any roof.

We have used your Rubber Roofing and Slate Roofing Paint, and consider them the best Roofing in use. The Slate Roofing Paint is the best for any roof.

SWEET OWEN, KY. Nov. 3, 1884.

STAMPER & SLAUGHTER, Merchants.

Have delayed answering until I could see the parties for whom I laid your Rubber Roofing. I can now say they are well pleased with the goods and prices for the same.

MILLSPRINGS, KY. Nov. 8, 1884.

JAMES M. DENNEY,

Mechanic and Lumber Dealer.

Slate Paint on Tin.=Two years tests.

We have been using your Paint on Tin roofs for the past two years find it all you claim and cheerfully recommend it to all wanting a good, durable Paint.

HICKMAN, KY. Nov. 25, 1884.

J. W. CORMAN & CO.,

Tinners and Hardware Dealers.

Have used your Roofing and have every reason to believe it is a good and cheap material. I recommend it,

J. A. PEEL,

SPRINGPORT, KY. Dec. 11, 1884.

Carpenter and Builder.

I am handling your Rubber Roofing and Slate Roofing Paint, and am well pleased with them.

UPTON, KY. Nov. 3, 1884.

A. J. UPTON,

General Store.

Universal satisfaction.

I have used your Roofing and Paints; they give universal satisfaction. T. D. WILSON. Contractor and Supt. of Buildings.
WHITE HALL, ILLS. Nov 5, 1884.

Does not leak a Drop.

Your Roofing and Paint gives me good satisfaction; I think them better than shingles as they are easier to put on, and better when on. My roof does not leak a drop.

CISSNA PARK, ILLS. Nov. 21, 1884. GEO. SINDETERSON, Farmer.

112,000 ft. covered with our materials.

I have used in this section 112,000 feet your 2 and 3-ply Rubber Roofing, and Painted 30,000 square feet of Roofs with your Slate Roofing Paint; all your materials give entire satisfaction. I enclose you the names of parties using them. HENRY REISKE,

MORRISON, ILLS. Nov 3, 1884. General Roofer.

All you claim.

Have used your Paint and Roofing in my neighborhood, and they are giving entire satisfaction. I am confident they are all you claim for then. L. S. GRIFFITH,

MINIER, ILLS. Oct. 27, 1884. Contractor and Builder.

We are well pleased with your Rubber Roofing and Paints. RAPP BROTHERS,

MORTON, ILLS Nov. 14, 1884. Manufacturers of Drain Tile.

My experience with your Rubber Roofing has been very satisfactory, have used your 2 and 3-ply, and recommend them to those wishing a cheap and durable Roof.

PERU, ILLS. Nov. 3, 1884. SIDNEY WHITAKER, Trader.

No one need fear a trial of Rubber Roofing.

I have used 5,000 feet of your Rubber Roofing and Slate Roofing Paint, and can cheerfully recommend them, for they are giving entire satisfaction. No one need fear to give them a trial. WM. H. BURCH,

VIRDEN, ILLS Nov. 3, 1884. Contractor and Builder.

No Roofing can be Better.

I have your Rubber Roofing in use and it gives perfect satisfaction. I think no Roofing could be better. C. L. NESMITH,

WASHINGTON, ILLS. Nov. 15, 1884. Manufacturer of Nesmith Grain Register.

Better than he expected.

In regard to your Rubber Roofing and Slate Roofing Paint, would say they are much better than I expected. C. HANKER,

TOLEDO, ILLS. Nov. 17, 1884. Contractor and Builder.

By far the Best satisfaction of any Roofing.

Your Rubber Roofing and Paint has given by far the best satisfaction of any I have handled. C. G. SLOCUMB,

KEITHSBURG, ILLS. Nov. 17, 1884. Lumber.

Prefers Rubber to Shingles or Tin.

Your Roofing Materials give us good satisfaction, I may say we like them much, we prefer them to Tin everywhere, and to shingles wherever a sufficiently steep pitch for the latter cannot be had; we expect to use more and more of it in the future. T. T. BENT,

OGLESBY, ILLS. Nov. 19, 1884. Manager Oglesby Coal Company.

Half the price of Tin and quite as Durable.

After 10 months trial I have no hesitation in recommending your Roofing. It is half the price of Tin and I think quite as durable, if not more so. M. VOTAW,

NEOGA, ILLS. Nov. 27, 1884. Undertaker.

I have used your Roofing, and it makes a No. 1 roof. It is cheap and easy put on. JOHN W. CHAMBERLAIN,

LITCHFIELD, ILLS. Nov. 25, 1884. Bricklayer and Contractor.

I have used your Roofing, find it all you recommend, and give it my highest endorsement. J. H. LOCKETT,

GEOGETOWN, ILLS. Nov. 28, 1884. Excelsior Mills.

I have been using your materials, and believe them to be better and cheaper than any others with which I am familiar. E. W. IRISH,

FARINA, ILLS. Nov. 25, 1884. Apriarian and dealer in Honey.

Will not recommend it.—But is satisfied is better than Shingles.

I had some friends come the other day to examine the Roofing put on last fall:—after a close look we failed to find anything against it. I told them I would not recommend yet, but if I was going to put a new building, I should use it in preference to Shingles.

VIRDER, ILLS. Nov. 27, 1884. ABEL RANDOLPH,

I used your Roofing, and have no hesitation in saying it is all you claim. It is only a question of time when it will take the place of all other materials for flat or steep surface. There can be no question about this. ASA C. KINDER,

FRANKFORT, IND. Dec. 1, 1884. Carpenter and Builder.

The dark night and —

I have used your Roofing and consider it as far ahead of a Tin roof as dark night is greater than a little nigger in size. If well painted, the roof will last a life time, and being fire-proof is another great advantage. J. A. PROVINES, Druggist.

SPENCERVILLE, IND. Nov. 24, 1884.

Your Roofing has given good satisfaction, and is the best and cheapest made; just the article wanted, being light and portable. W. W. STEAVENS,

NERO, IND. Nov. 24, 1884. Miller and Lumberman.

We have 1,500 ft. your Roofing on our Tile shed and are well pleased with it.

HARVEYSBURG, IND. Nov. 25, 1884. GEO. E. MOORE & BRO.,

Tile Makers.

An old Builder who sleeps sound.

I have used your Rubber Roofing on a building, and am pleased with it. I honestly think it to be the cheapest and best roofing ever used, safe from fire at all times, and a perfect Roof; no leakage, and from all indications is the roofing that should be adopted by all parties with a view to economy. I have been builder for 25 years, though now on my farm retired from active business, my age is past 69, and having tried to live an honest life, and having large landed estate worth \$100,000 or more, I wish to sleep sound without fear of being burnt up during the night. I recommend your Rubber Roofing in preference to Shingles, Gravel, Tin or Iron, all of which have been leaky and defective, and are fast going out of use. I am now a farmer, and never expect to use anything but Rubber Roofing with Slate Paint, forming a solid sheet of Rock, which is impregnable to fire.

MONTGOMERY CITY, Mo. Nov. 2, 1884.

NOAH LEE,

Stock Farmer.

We believe your Roofing good and a success. Your Slate Paint is also good, and gives satisfaction.

EDGERTON, Mo. Dec. 2, 1884.

HANDLEY & LAMPTON,

Lumber and Building Materials.

I put your Roofing on a pine match board Roof, it kept as smooth as a table, and looks as if it would last 40 or 50 years.

WELDON SPRING, Mo. Nov. 24, 1884.

WM. FEY,

Dry Goods, &c.

No trouble to repair Flat Roofs.

Your Rubber Roofing fills the bill all O. K. I shall cover all my buildings with it, as fast as the old Roofs give out. It will be extensively used here, as it is so good for flat roofs and no trouble to fix them.

PLATTSBURG, Mo. Nov. 17, 1884.

W. C. DEVALL,

Devall's Mills.

Slate Paint A 1 for any Roof, new or old.

I have used considerable of your Rubber Roofing and Slate Roofing, and they have given good satisfaction, especially the Paint, which I consider A 1, and do not hesitate to recommend; would put it on any Roof of my own, whether new or old.

N. H. ALEN,

Druggist.

KIRKWOOD, Mo. Oct. 31, 1884.

30,000 sq. ft.—A perfect success.

The Rubber Roofing and Paint I got from you is a success; I have put on in this town about 300 squares, and can recommend it to any one.

P. KILTZ,

RICH HILL, Mo. Oct. 27, 1884.

Contractor and Builder.

Slate Paint.—A worthless Tin Roof made perfectly tight.

I have a Tin Roof on my gallery and room attached, which leaked all over: following your directions, I used your Slate Roofing Paint, and is now perfectly sound.

BURLINGTON JUNCTION, Mo. Nov. 20, 1884.

JOHN T. STROUD, Photographer.

So far as I have used your Rubber Roofing and Slate Roofing Paint, I think them superior to any other Roofing.

WM. SMITH,

RIDGELY, Mo. Nov. 20, 1884.

Carpenter and Farmer.

Elevator Co.—“Not effected by heat or cold.”

We take pleasure in bearing testimony to the excellence of your Rubber Roofing and Slate Roofing Paint, they are cheap, durable and not effected either by heat or cold.

MACON, Mo. Nov. 18, 1884.

MACON ELEVATOR COMPANY,

Dealers in all kinds of Grain.

Superior Roofing for Flat Roofs.

I have used quite a quantity of your Rubber Roofing, and am favorably impressed with it, especially on cheap flat Roof buildings.

C. E. PACKARD,

CAMERON, Mo. Nov. 17, 1884.

Farmer.

A master Mechanics report.

I covered a building 46 x 80 with your Rubber Roofing a year ago; a master mechanic examined it last week, and says it is perfect and as firm as it was when first put on. In regard to your Paint there is none better, but Painters make a great mistake in not using it as it is sent to them, they are apt to make it too thin.

JAS. R. WOOLFENDEN,

NEOSHO, Mo. Nov. 4, 1884.

Trader.

More than meets their expectations.

I had the honor of putting your Rubber Roofing on two brick stores one year ago, and this year I covered our Opera house; there has been two or three blocks covered besides; we all think Rubber Roofing is the best. It more than meets our expectations.

NEOSHO, Mo. Nov. 3, 1884.

B. L. DENNISON,

Contractor and Builder.

The best Roof he ever saw.

It makes the best Roof I ever saw, and all that see it like it.

ARGENTA, ARK. Nov. 23, 1884.

JOHN LAFORE,

Car Inspector L. R. & F. S. Shops.

I have used your Rubber Roofing and Slate Roofing Paint, and take pleasure in saying that they have given entire satisfaction. They stood the extreme hot weather last summer, and are all right yet.

BEEBE, ARK. Nov. 15, 1884.

F. P. LAWS,

Machinery, Wagons, Plows and Lumber.

Worthless Tin roof effectually repaired with Slate Paint.

Your Slate Roofing Paint and Cement has given me a tight Tin roof, that had been on 26 years. The tin was full of holes and leaked all over; since the Paint and Cement were applied I can see no leaks.

RACINE, WIS. NOV. 26, 1884.

Merchant.

Slate Paint permanently repairs old Roofs.

From the experience I have had in the use of your Slate Roofing Paint, I think it just the thing to preserve new Roofs, and permanently repair old ones.

H. E. FRISBIE,
CHAS. F. BLISS,

PINE RIVER, WIS. NOV. 17, 1884.

Furniture and Agricultural Implements.

Used on Flour Mills.—Used on Saw Mills.

I have your Rubber Roofing on my Flouring and Saw Mills, and it has given me entire satisfaction. Have no hesitation in recommending it to the public.

J. D. KAST,

SHAWANO, WIS. OCT. 30, 1884.

Prop. of Shawano City Flouring and Planing Mills.

I consider your Rubber Roofing a success.

DARLINGTON, WIS. NOV. 1, 1884.

J. B. DRIVER, Druggist.

Would not exchange it for Tin.

Your Rubber Roofing on my new office is giving good satisfaction; would not exchange it for a metal roof at half the cost.

J. C. SARGENT, P. M.,

POYNETTE, WIS. OCT. 29, 1884.

Justice and Collecting Agent.

Cheaper than any other Roof.—Costs less to lay it.

We have used your Rubber Roofing and Slate Paint, and it makes a good Roof, it is as cheap or cheaper than any roof we could have put on that will do service, it has the appearance it will do; we know it costs us much less to lay it than any roof we could obtain. We will be glad at anytime to report the durability of it. As it has only been on two years, we can only say it is perfect now.

VAN BRUNT & DAVIS CO.,

HORICAN, WIS. NOV. 2, 1884.

Monitor Seeder, Grain Drill and

Combined Riding Wheel Harrow and Cultivator.

NOTE.—This Company have a capital of nearly \$100,000, and are favorably known thro' out WISCONSIN and neighboring States.

Been sorry for two years.

The Roofing laid on a part of my house over two years ago really more than satisfied me. Most of the Roof I had covered with Shingles, for I kind of mistrusted Rubber Roofing I have felt sorry ever since that I didnt cover the whole house with your material; it looks just as if I had it put on to-day.

TRÄNGOTT ZIEGER.

RICHFIELD, WIS. NOV. 25, 1884.

The articles are good and give satisfaction to all.

LOUIS MARTIN,

SPRINGFIELD CORNERS, WIS. OCT. 15, 1884.

General Store.

I take great satisfaction and pleasure in recommending your Roofing, and I believe it to be just the thing. I have used it, and am perfectly satisfied, finding it to be all claimed.

LYONS, WIS. DEC. 8, 1884

R. B. WINSOR,

Manf. Harness.

Best for all buildings intended to be Fire-proof.

We consider your Rubber Roofing the best that can be used for all buildings, intended to be fire-proof, in this climate.

STAPLES BROTHERS,

ST. CLOUD, MINN. NOV. 6, 1884.

Lime, Plaster and Cement.

No more Shingles for them.

Your Rubber Roofing gives entire satisfaction. No more Shingles for us.

NEW LONDON, MINN. NOV. 19, 1884.

NEW LONDON MILL CO.,

Manufacturers of Flour and Feed.

Unequaled for Gutters.

Your Rubber Roofing properly applied cannot be discounted for all kinds of Roofs, it is also first-class for gutters; as I have tried it, I know whereof I speak.

C. G. WHITE,

MANKATO, MINN. NOV. 8, 1884.

Blank Book Maker.

Steam and water have no effect.

It makes a far better Roof than Shingles, it is as hard as a stone, and the weather does not have any effect on it. I put some strips of Rubber Roofing under a steam-box to carry off the water that ran out. The water or steam do not have any effect on it, only to make it harder.

GEO. CLEVELAND,

SAUK CENTRE, MINN. NOV. 28, 1884.

Farmer.

Far ahead of Tin or Iron for flat Roofs.

I have used Rubber Roofing and think it far ahead of Tin or Iron for flat Roofs, and will last longer than either if kept Painted. I am very much pleased with it.

TOWER CITY, D. T. NOV. 6, 1884.

JAMES MUIR,

Contractor and Builder.

A Superior Roofing for Dakota Climate.

In the last two years we have sold over 325 squares of your roofing, and it has given the Best of satisfaction to all parties. It is generally considered here to be superior to Iron, Tin or Composition for Roofing in this climate.

SMITH BROS.,

CASTLEWOOD, IOWA. DEC. 15, 1884.

Lumber, Sash, Doors, &c.

Your Rubber Roofing and Slate Paint used on a house I built in Garry, Dak. has given entire satisfaction.

TIMOTHY COLE,

236 S. Water St., CHICAGO, ILLS. NOV. 6, 1884.

Cedar Posts and Lumber.

Can be applied by any workman.

Your Rubber Roofing and Paint are on my buildings, and I am well pleased with them, they can be put on by any workman.

DEEP SPRINGS FARM, Rock Co., N. C. Nov. 12, 1884.

T. B. LINDSAY

Farmer and Stock Raiser,

A master Mechanics report.

After careful investigation, I have concluded that your Rubber Roofing supersedes any thing else in Roofing material. It has given entire satisfaction where I have used it, and I prefer it to any other materials for the purpose; I have also found your Slate Roofing Paint to be all you recommend it. I have used it on outside of brick walls with good effect, and can now say after a trial of two years: your goods have proved to be all you claim for them.

McDONALD, BRADLY Co., TENN. Nov. 8, 1884.

Master Mechanic.

I am perfectly satisfied after using your manufactures for several years. The Paint is better than any other, and the Roofing gives satisfaction to all.

J. M. STIGER,

GLENMORE, GA. Nov. 24, 1884.

Georgia Farms.

Moist Atmosphere and heated Summers.

Your Rubber Roofing and Slate Paint both stand the test of this moist atmosphere, (on the coast,) and the long heated terms thro' the summer. They successfully meet the long felt want of a cheap and durable Roof.

DAVID D. ROGERS,

DAYTONA, HALIFAX RIVER, FLA. Dec. 8, 1884.

Civil and Railroad Engineer.

A Tropical climate does not effect Rubber Roofing.

About a year ago I used your Roofing over old Shingles; also on a flat Porch Roof, and on a wood-shed. In all cases it satisfies me better than any Roofing or Paint I ever had, and I have tried several kinds, and have seen many others tried, none of which gave satisfaction in this climate of alternate rain and sunshine; some Roofings mould:—others shrink; while most of the so-called Paints "run" when under the rays of a noon sun in summer. I recommend your Roofing for a Tropical climate.

EDGAR N. WALDRON.

DAYTONA, FLA. Dec. 8, 1884.

A Contractors' experience.

I endorse your Rubber Roofing and Slate Roofing Paint, having used and sold considerable here and at Orlando, all of which has given entire satisfaction.

PLANT CITY, FLA. Nov. 12, 1884.

JOSEPH BLANC, Contractor.

Recommends Rubber Roofing to the Trade.

Having used your Rubber Roofing and Slate Roofing Paint, I take pleasure in recommending them to the trade.

J. M. IAGON, P. M.

FORT MASON, FLA. Nov. 18, 1884.

What the Mayor of Cedar Keys says:

"No difficulty in making roofs tight, even with inexperienced labor"

I have used your Rubber Roofing and Slate Roofing Paint for two years past on a number of buildings, and am very much pleased with them. I found no difficulty with inexperienced labor in making roofs perfectly tight, and the cost of putting it on is very small, this Roofing will last well, and be found to be the cheapest article that can be used in this climate.

CEDAR KEYS, FLA. Nov. 10, 1884.

E. J. LUTTERLOH,

Agent Florida Farm Improvement Company.

Constant Showers and intense Heat.

About one year ago I tried 72 squares your Rubber Roofing and Paint on my Florida Dwelling and stables. The past season has been remarkable for the large number of showers and intense heat, the constant alternation of which have severely tested my Roofs. I am glad to be able to report that your material has made a tight and satisfactory roof, and the indications are that the roof will remain in perfect condition for a long time.

ROCKLAND, ME., and LAKE GRIFFIN, Fla. Dec. 3, 1884.

DAVIS TILLSON,

Proprietor of Hurricane Granite Co., Building Granite and Monuments.

Good Roof for a Gin House.

I used the Roofing to cover a Gin house; it makes a very good Roof, and I am much pleased with it.

E. CORDUVENT,

VICKSBURG, Miss. Nov. 24, 1884.

Belle Isle Plantation.

Plantation buildings.—Two years test.

I have three buildings on my Plantation covered with your Roofing about two years ago. They have never leaked a drop except one place, where a nail missed the sheeting, and this was effectually stopped with a little of your Paint. Rubber Roofing is quite superior to shingles, can be put on by any one of ordinary mechanical capacity, in less than half the time required for putting on Shingles; and I judge it will out last any Shingle Roof, by being painted every two years with Slate Paint.

CHARLES T. MILES,

RIVERTON, Miss. Dec. 10, 1884.

Planter.

I have given your Roofing a thorough trial, and am satisfied it is as good as any in existence.

H. S. NEWCOMB,

ASHTON, LA. Nov. 19, 1884.

General Mdse.

I have used your Slate Roofing Paint, and am much pleased with it.

FRIERSON's P. O., LA. Nov. 19, 1884.

S. J. FRIERSON, Gen'l Store.

I put on your material in 1882 where it would be most exposed to the sun and weather I examined it to-day, find it stands well, and consider it as good as any Roofing in the market. It is easy to apply and if injured, easy to repair.

J. W. ROCHE,

OSWEGO, N. Y. Jan. 5, 1885.

Farmer.

I have used your Roofing, find it as good as recommended and think it first-class for a Roof, on a house or any building.

A. A. BARNHART,

SHAVERTOWN, N. Y. Dec. 28, 1884.

Lumber.

Your Roofing answers well, and is all required for a good Roof.

58 Troutman St., BROOKLYN, N. Y. Dec. 22, 1884.

ANDREW STENGER.

Sinclairville, New York.

I used your Roofing on Flat Roofs, and do not hesitate to recommend it to all wanting a good Roof.

W. H. TAYLOR,

SINCLAIRVILLE, N. Y. Dec. 1, 1884.

Grocer.

I have used your two-ply on my Mill, and find it all claimed.

C. E. DENISON,

SINCLAIRVILLE, N. Y. Dec. 1, 1884.

Sinclairville Feed Mills.

I had your Roofing put on my Barn a year ago last August. It is a first-class Roof.

SINCLAIRVILLE, N. Y. Dec. 1, 1884.

D. B. DORSETT, Farmer.

Your three-ply makes the Best Roof I ever had. It was put on a flat Roof, where Tin gave out. I take pleasure in recommending it to those who want a first-class Roof.

SINCLAIRVILLE, N. Y. Dec. 1, 1884.

S. NORTON, Harness, Trunks, &c.

A fair trial will convince any one that your goods are the very best in the market, and all you claim for them. If I were to build I should use no other material for Roofing, and I say this after my Roof has stood for three years.

J. L. KEFFER,

DUNBAR, PA. Dec. 22, 1884.

Carpenter.

The Roofing manufactured by you, which I have used on my own Buildings, and that sold some of our most practical men has given satisfaction. I recommend it as the cheapest and best to be had.

J. O. WAGNER, M. D.

BEAVER SPRINGS, PA. Nov. 15, 1884.

Always a leak "somewhere" in Tin Roofs.

I am very much pleased with the 50 squares three ply. I put 44 squares on Choral Hall and six squares on flat part of my dwelling; I applied two coats of Slate Paint, which is the Best water-proof Paint I ever saw, it has such a heavy body: the one coat of fine sharp sand I put on, in about two weeks was tight and solid to the Paint, and you would think it was a granite Roof. I think by giving it one coat your Slate Paint every five years, it will last twenty-five years. I have had Tin Roofs put on, but there was always a leak some place: not a single leak in the 50 squares since completed over six months ago.

SEWICKLEY, PA. Dec. 3, 1884.

JOHN McMILLEN,

Contractor and Builder.

Used 10,000 ft.

I have used about 100 squares of your Roofing, and find it gives good satisfaction; the first I used was a year ago last Aug., and it looks as well now as it did the day put on.

FULTONHAM, O. Dec. 22, 1884.

R. F. CHILCOTE, Carpenter.

My judgement is favorable to your goods. I covered a house and barn shed with the Roofing, and partly painted same buildings with your House Paint.

J. R. DUNLAP,

PERRYSVILLE, IND. Dec. 17, 1884.

Tanner.

Nothing better for Kitchen Roof.

I used your materials over a year ago to cover a kitchen built beside of house, and not very steep. Your Roofing makes a good Roof, is easy put on, and has given good satisfaction.

WM. A. DEAL, Farmer.

WINDHAM, Io. Nov. 29, 1884.

Absolutely water-proof.

The Roofing obtained from you in 1883 and also in 1882 proves first-class. It is absolutely water proof, and more fire-proof than any other here.

WM. WERHAN,

FOREST MILLS, Io. Nov. 29, 1884.

Lumber.

Very flat;—Five inches fall in seven feet.

I used your Roofing on very flat Roofs, and it gives entire satisfaction. One porch Roof had only 5 inches fall in 7 ft., also carried the water from two other Roofs. Rubber is all that can be desired, and better than Tin or Shingles; it can be used where Shingles cannot.

BATAVIA, Io. Nov. 28, 1884.

LEANDER POWELSON,

Carpenter and Builder.

The very best for Farmers.

In 1882 I put your Roofing on my Granery, which I occupied as a dwelling until the spring of 1883. When laid I put on only one coat of Paint; the winter was very severe, with a great deal of snow, but the Roofing was all right in the spring. On July 13 we had a severe hail and wind storm pass thro' this country, the hail being five inches deep in the orchard around the Granery, and a number of the trees being blown down and torn to pieces. Your Roofing altho' not sanded stood the test well, not being damaged in the least; I do not think there could have been one single square inch not hit with hail. Your Roofing is the very best I know anything about, and would particularly recommend it to Farmers for all purposes.

L. S. DODGE

SIDNEY, Io. Dec. 8, 1884.

Prop. "Elm Grove" Herd Short Horn Cattle.

House Paints:=the best of all mixed Paint.

I have been in the Paint and Drug business in this place for twelve years, and have endeavored to get a Paint that would give the best satisfaction to my customers, regardless of cost. I must say that your Paints are the best I have ever tried; they give better satisfaction than any I have ever sold, and at less cost to customers.

SIOUX RAPIDS, Io. Nov. 15, 1884.

JAS. M. HOSKINS,
Trader.

Does not require the repairs of Tin.

We used your Rubber Roofing on our Implement ware-house, and it gives good satisfaction; does not need as much repairing as the Tin Roof on our store building. The Slate Roofing Paint is the best in the market for the purpose intended.

ESTHERVILLE, Io. Nov. 29, 1884.

A. O. PETERSON & CO.,

Shelf and heavy Hardware.

Foundry Roof.—Often walked over.—A surprise.

One year ago I covered the Roof of my machine shop with your materials, although we often walk over it, it has not leaked. The Roofing has become as hard as leather, which has surprised me.

WAUKON, Io. Nov. 4, 1884.

Foundry, Machine Shop and Farm Implements.

It beats all other Roofing.

My opinion of your three-ply Rubber Roofing is, that it beats all others, and I will continue to use it.

DAVENPORT, Io. Oct. 31, 1884.

T. O'SHAUGHNESSY,

General Store.

Architect.—Always specifies Slate Paint for metal and wood Roofs.

Having used your Slate Roofing Paint I find it the best, and shall always recommend it in my specification for metal and wood Roofs.

CLARINDA, Io. Nov. 21, 1884.

N. A. OLSTON,

Architect and Superintendent.

Proved entirely satisfactory.

Your Rubber Roofing and Slate Roofing Paint has proved entirely satisfactory, and in my judgement are all that is claimed for them.

COIN, Io. Nov. 19, 1884.

A. G. BACON, P. M.

Three years trial.

I have used your Rubber Roofing for three years, and from what I know of it in that time, I believe it to be durable, warmer and second to no other Roofing in the market.

MILLERSBURG, Io. Nov. 14, 1884.

WM. CARY,

Paints, Oils and Drugs.

A Stock raisers experience.

Your Rubber Roofing and Slate Roofing Paint are better than I anticipated; they fully answer all you claim. The Paint has a good body, is easily applied, and the best for the purpose I have ever tried.

COUNCIL BLUFFS, Io. Nov. 17, 1884.

JOHN CLARK,

Farmer and Stock Raiser

Stock shelter.—Wind cannot penetrate Rubber Roofing.

Flat Shingle Roof.—Slate Paint stops all leaks.

Your Rubber Roofing is just the thing for this country; more especially for stock shelter than anything else, for the wind will not go through it: besides it is cheap, and nothing is going to eat it. Your Slate Roofing Paint is just the thing for new or old Shingle Roofs; I Painted a very flat Roof this spring that leaked badly, the Paint stopped the leaks and appears now to be as hard as Iron.

SPRING HILL, Io. Nov. 17, 1884.

JOHN M. FAGAN,

Farmer.

28 years a Rooter.=He tests Rubber Roofing and wants a car-load.

I laid 8,500 feet your 3-ply Rubber Roofing for the Ottumwa Skating Rink Co. of Ottumwa, Io., and I like it very much, especially for a steep Roof. Ottumwa is my head-quarters: I have done all the roofing in that place for seven years. At what price will you deliver me a car-load to Ottumwa, Io.? also give price to Memphis, Tenn., at which point I have done work more or less, for six years.

COLUMBUS CITY, Io. Nov. 13, 1884.

B. BARTHOLEMEW,

23 years a Roofer.

Neat, durable, and perfectly fire-proof covering.

Your Rubber Roofing and Slate Roofing Paint has given good satisfaction here, both on old and new Roofs; they make a very neat, durable, and perfectly fire-proof Roof.

McGREGOR, Io. Oct. 28, 1884.

GEO. H. JENKINS,

Brick Manufacturer.

Insurance agents opinion of our Paints,

We cheerfully recommend the use of your Paints to any person, who wants a good article and very cheap; all we have sold here gives the utmost satisfaction.

LE MARS, Io. Nov. 3, 1884

CHAPMAN & RICHARDS,

Insurance Agents.

Dakota winds and hail-storms have no effect on Rubber Roofing.

I have used your Rubber Roofing and Slate Paint, and they give me the best of satisfaction. They have stood the Dakota winds and hail storms, and are as good to-day as when put on.

LA BEAU, Walworth Co., D. T.

C. A. POWERS,

Farmer.

On the coast.

I have my house Roofed with your materials, and they have given good satisfaction. They are easily applied, light, and should be durable. R. A. H. Mac KEEN, M. D. COW BAY, CAPE BRETON.

Rubber Roofing its own recommend.

How one export sale brings others.

A gentleman who put your Roofing on a house he built, speaks so highly of it, I have concluded to use it on a Flat Roof of a machine shop I am erecting. You will therefore please send me 3,900 ft. by very first Steamer. INTERNATIONAL COAL CO., Limited.

CAPE BRETON, Dec. 3, 1884.

I laid your Rubber Roofing and so far I like it; if it stands our cold winters, you will hear from me again. L. A. ROGERS,

DOVER, ME. Nov. 14, 1884.

Genl. Store.

Two years test and still first-class.

I have used your Rubber Roofing and Slate Roofing Paint for two years, and do not hesitate in saying I consider them first-class Roofing. BENJ. AMES,

THORNDIKE, ME. Nov. 10, 1884.

Carpenter and Builder.

I have used your Rubber Roofing and Paint; think them first rate articles, and equal to all you claim. N. B. PARINTON,

TOPSHAM, ME. Nov. 5, 1884.

Trader.

Covered 40 buildings.

I have covered about 40 buildings with your 2 and 3 ply Rubber Roofing in the last two years, and in no case has it failed to give satisfaction, the same parties buying of me this year as last. Your Slate Roofing Paint is just what the People want, who have leaky Roofs, either Tin, Iron or Shingles. GEO. W. BURNHAM,

MONTPELIER, VT. Oct. 30, 1884.

Roofers.

A cold test.—Why he likes Rubber Roofing.

I have had your Rubber Roofing on my engine house for one year; the ice remains on this Roof six months in the year; the Roofing does not crack, is much cheaper than shingles, and I like it. EDSON DOER,

SOUTH NEWBURY, VT. Nov. 5, 1884.

Saw Mill.

Granite Works use Rubber Roofing.

We have used your Rubber Roofing and Slate Paint and take pleasure in recommending them to anyone wanting a good Roof, with a coat of Paint every five or six years.

SOUTH BARRE, VT. Nov. 4, 1884.

DUNHAM & JACKSON,

South Barre Granite Works.

Three years test.

I will say that Roofs I put on nearly three years ago are apparently as good as when first laid, the Slate Roofing Paint preserving them with small expense, no more than is usually required for Tin Roofs. H. H. HURLBURT,

BENNINGTON, VT. Nov. 18, 1884.

Paints and Roofing Materials.

Office of Bridgewater Iron Co.

Bridgewater, Mass. Jan. 7, 1885.

We have recently made an examination of the Rubber Roofing purchased in 1882, and are pleased to say it is apparently in as good condition as when put on.

BRIDGEWATER IRON CO.

NOTE.—The above Co. was established in 1810, they employ 500 men, consume annually 11,000 tons coal, 64,000 bushels charcoal, 8,000 tons iron, 500 tons copper. This firm are the largest manufacturers in the U. S. of Seamless drawn copper tubes and heavy machinery.

Light, tight and durable;

I am well pleased with your Rubber Roofing, it is light, tight and durable, and can cheerfully recommend it. J. H. DORRANCE,

ATTLERO, MASS. Nov. 16, 1884.

Farmer.

Four years trial.—Best and most economical Roofing.

I have used your Roofing for the past four years, and in every place where it has been used, it has given the best of satisfaction. I consider it the best and most economical Roofing in the market. A. F. BEARSE,

CORUIT, MASS. Nov. 15, 1884.

Genl. Store and Undertaker.

The Best, of many kinds, he ever used.

I have used your Rubber Roofing on several buildings, and it has given good satisfaction. I think it the best composition Roofing I ever used, and I have used a good many kinds.

ROCKWELL ST., DORCHESTER DIST.,

E. F. MOULTON,

BOSTON, MASS. Nov. 17, 1884.

Contractor and Builder.

The Roofing applied on my building some 15 months since, has fully met my expectations, and proved itself all you recommended. I believe its merits for Durability are not over stated. DANIEL RUSSELL.

MELVEN, MASS. Dec. 1, 1884.

I have used your Rubber Roofing and Paint; it has stood well during the summer, and if it winters well, I will be satisfied. PROCTOR WHITAKER,

NEW SALEM, MASS. Nov. 10, 1884.

Bricklayer

Rocky Mountain Test—10,400 ft. above Sea level.

In the spring of 1883, I purchased a quantity of your Rubber Roofing for my Store and Post Office, these buildings are situated at an altitude of 10,400 feet above Sea level.

Last winter was one of the most severe ever known in the Rocky Mountains, and I am pleased to state that your Roofing withstood the severe test it was subjected to, in a manner entirely satisfactory. For six months it was covered with Snow and Ice, to a depth of from **two to six feet**, and the Roofing is as good *to-day*, as the day it was put on. This could not be said of any Shingle Roof in a country like this.

MOUNT SNEFFLES, CO. Nov. 21st, 1884

GEO. R. PORTER,

Miners Supplies and General Mdse.

I have used your Roofing material and find it gives entire satisfaction.

PARK CITY, UTAH. Oct. 21, 1884.

THOS. W. COOKE,

Carpenter and Builder.

Resists coal smoke and cinders better than tin or iron.

I used your Rubber Roofing over shingles on a very flat Roof, it gives perfect satisfaction, resisting the action of coal smoke and cinders better than tin or iron; it is all you claim for it.

OSWEGO, KANS. Nov. 19, 1884.

J. E. PATTERSON.

Carriage & Repair Shop.

The best in use.

I am well pleased with your Rubber Roofing, and Slate Roofing Paint, think they are the best in use.

HENRY EBERLE.

ARTHUR, KANS. Nov. 3, 1884.

I have used your Rubber Roofing for one year, and it has given satisfaction.

LOUISBURG, KANS. Nov. 7, 1884

GEO. GLENDENING.

Farmer.

A tinner's opinion—Better than Tin.

I put on 2,000 feet your 3-ply Rubber Roofing, and I will say that it is a better Roof than tin. I am a tinner *myself* and have put on many Roofs, but never had one that gave so little trouble as your material has done; it is cheap, fire proof and durable, and can cheerfully recommend it. I am now in the furniture business, doing business under your Roofing.

WETMORE, KANS. Nov. 10, 1884.

E. S. FRAGER.

Furniture.

Myself and friends like your Rubber Roofing and think when its merits are generally known, it will keep you busy supplying the demand.

WM. H. BOWER.

MANHATTAN, KANS.

Furniture Dealer.

Three years test.=The very best Roofing.

Orders more.

I have used your Materials, and you can tell how well I like them by enclosing money in this for more; also send house Paint per memo'.

JOHN D. SIMPSON.

WALNUT RIDGE, ARK. Dec. 24, 1885.

Hardware, Roofing, &c.

Elevators and Cotton Sheds.

We take pleasure in recommending your Rubber Roofing. We have used it in covering our Elevator and Cotton Sheds, with results that have proved perfectly satisfactory.

HELENA, ARK. Nov. 13, 1884.

BERTON & JOHSON,

Receiving and forwarding Merchants, Proprietors of Elevator and Cotton Sheds.

The Best in use.

We have used your Roofing and find it good; have also used your Slate Paint, and believe it to be the best in use. Send us 10 rolls Roofing complete same as last and a bbl. of Paint.

RIGGIN & MORRIS,

PINE BLUFF, ARK. Nov. 27, 1884.

Star Planing Mills.

Feels like Shark skin.

I used your materials on several roofs, and the more I see of them the better I like them. After painted and sanded, the effect of the weather seems only to improve it; makes it stout and feels like Shark skin. I have not had the first leak, even on flat Roofs. It answers as well to line a gutter, or valley as Tin.

J. B. WILLIAMSON,

ARGENTA, ARK. Nov. 28, 1884.

Architect and Builder.

Judge Redmond recommended it.

We have used your Rubber Roofing and it has given good satisfaction. It makes a nice Roof, is easily put on, and as cheap as could be expected for a good roofing material. The bbl. of your Slate Roofing Paint that we have used, is the best Roofing Paint that has come under our notice; we got it on the recommendation of our friend, Judge Redmond, who had tried it, and found it all you claimed.

PETTEFER BROTHERS,

LITTLE ROCK, ARK. Nov. 17, 1884.

Architects, Builders and Brick Manufacturers.

Paints, Oils, Drugs, &c.

I have used your Roofing on my house, and it is first class, the best I ever saw. We had a heavy storm here, that blew down about twenty houses; not a house in town but leaked excepting mine, which did not leak a drop. I never saw a better Roof, and so easily put on.

WICHITA, TEXAS, Nov. 25, 1884.

WILLIAM STILL.

Contractor and Builder.

Two years and a half Test.

I have used your 3-ply Rubber Roofing since June 1882, it gives perfect satisfaction in every respect. I believe it to be far ahead of metal Roofing, and I intend to use it on all my Roofs hereafter; had it not been for the crop failure in this section, large quantities of the goods would have been used this fall and winter.

W. B. LEVERTON,

BOWIE, MONTAGUE Co., TEXAS, Nov. 23, 1884.

Contractor and Builder.

Shingle Roofs.—How he repaired them.

I consider your 3-ply materials a *reliable* and *desirable* Roofing, for business houses and all the better class of buildings. The Temporary makes an excellent and very cheap Roof for sheds, and all low prie buildings. But an important part of my business has been Painting Shingle Roofs, with your Slate Paint. I have used many hundred gallons: the Roofs have been in various conditions, and in all cases the Paint has stopped leakage, preserved the Roof, and given satisfaction. I first go over an old Roof, taking out all totally decayed shingles, and carefully fit in new ones: cement around flues, &c.:—then paint heavily one coat. Your Slate Paint brings down all curled or warped shingles, fills up all cracks, and the painted Roof presents a smooth even surface. To stop leaks in match board Roofs on porches, &c., we paint freely with Slate Paint, then sprinkle on all the fine sand that can be made to stick: after that dries apply another coat of Paint. This is the best thing I have ever found for the purpose.

D. B. CHANNELL.

CANTON, PA. Jan. 16, 1884.

A better roof than Tin.

I am well pleased with your Rubber Roofing which I put on. I find it makes an excellent Roof, preferable to tin and in my estimation a better roof in many respects.

WETMORE, KANS. Aug. 25, 1884.

E. S. FRAGER.

Furniture Dealer.

For Ice houses—"Rubber" is Best.

In answer to your circular letter, would say I like your Rubber Roofing enough to order 30 squares more for an Ice house; please send at once with every thing complete for a new Roof.

A. O. PITCHER,

MOUNT PLEASANT, IO. Jan. 15, 1885.

Capitalist.

Tile Works recommend Rubber Roofing.

We have used your Rubber Roofing and Slate Paint on our Tile Works, and believe them the most economical and durable roofing we could use.

POLLOCK & BRO.,

SULLIVAN, IND. Nov. 15, 1884.

Manufacturers of Stoneware, Drain Tile, Sewer Pipe,

Fire Brick, &c.

The Virtue of Economy, no small Merit.

Have used your Roofing on my farm buildings more than a year, and they are working to my full satisfaction. The ease with which it is applied, (requiring no skilled workman,) renders possible, the virtue of Economy, which in most matters is no small merit.

FAENWOOD, N. J. Nov. 29, 1884.

F. D. CHASE.

I used your Roofing on my barn-size 40x30 feet-slant 2 feet, and it has done admirably. I see no reason why it should not last for years, if given a coat of Slate Paint occasionally.

LAKWOOD, N. J. Dec. 15, 1884.

JNO. B. PORTER,

Engine and Machine Works endorse Rubber Roofing.

The Rubber Roofing and Slate Roofing Paint I bought of you two years ago, has given good satisfaction, and I have no cause to complain.

MERVIN McKAIG,

CUMBERLAND, MD. Nov. 17, 1884.

Beall Engine and Machine Works,

Manufacturer of the Mogul Engines.

I cheerfully recommend your goods, especially your Slate Paint. I think it better than any I ever used for outside rough work, Roofs, &c. Your felt makes a good Roof, when rightly managed, and is cheaper than Tin.

S. W. SMATS, with W. H. Claire,

BUFFALO GAP, Augustan Co., VA. Dec. 4, 1884.

Heading and Lumber Manf.

I used your materials on a flat Roof: it has not leaked a drop and gives perfect satisfaction. They are the best I ever saw or used, and I recommend them to anybody that wants a good and cheap Roofing.

JOHN S. WRIGHT,

HAYES STORE, VA. Dec. 13, 1884.

Blacksmith and Wheelwright.

I have used 40 squares in the last 18 months, and I find it to be as represented. I think it the best and eheapest Roofing that can be used.

J. E. SIMMS,

MOUTH OF SCORY, W. VA. Nov. 22, 1884.

Liquors.

A Plauters test.

I have had your Rubber Roofing in use 16 months, taking in the warm part of two summers, and it is to-day as firm as when put on.

SAMUEL WINE,

Mt. SIDNEY, VA. Nov. 7, 1884.

Planter.

An everlasting Water-proof roof.

I have used your Rubber Roofing and Slate Roofing Paint, and consider them the cheapest and altogether the most economical roof that can be laid, considering its qualities, as a fire-proof, and everlasting water-proof roof.

T. C. DYE, General Store,

REES TANNERY, W. VA. Nov. 20, 1884.

Your Roofing has been on my buildings one year, am well pleased with it; it shows no signs of anything but a success, shall use twice as much next year.

N. R. BOOR,

BANACKSVILLE, MARION Co., W. VA. Nov. 17, 1884.

Farmer.

Over Three years Test.

After Testing your Rubber Roofing and Slate Roofing Paint over three years, I pronounce them first-class in every respect.

M. M. MARTIN,

BINGAMON, W. VA. Dec. 1, 1884.

Trader.

Sorry he didn't save \$40.00.

The Rubber Roofing used on my barn over a year ago gives entire satisfaction; no indications of giving out, I am only sorry that I had not used it on my residence built two years ago, which would have saved me forty dollars in price, and given a preferable roof to tin, which I used.

D. M. SHARPNACK,

PETROLEUM, W. VA. Nov. 22, 1884.

Real Estate and Collecting Agt.

It dont leak a drop and nothing hurts it.

The Roofing bought of you last fall is superior to anything I ever saw for a cheap Roof; nothing seems to hurt it: it don't leak a drop, and every body likes it. I want the agency send me some circulars.

G. G. BROWN.

PRINCETON, KY. Jan. 5, 1885.

I find your Roofing good, durable and cheaper than Shingles: the Roof I put on has given good satisfaction.

G. W. QUIDE,

REYNOLDS, NEB. Dec. 20, 1884.

Carpenter.

Kansas—a good and durable roof.

We have used your Rubber Roofing and Slate Roofing Paint, and are satisfied if properly put on, they make a good and durable Roof.

WILLIAMS, WEMER & CO.

HOLTON, KANS. Nov. 19, 1884.

Hardware, Lumber, &c.

18 hours rain before Painting.

I am well pleased with your Roofing on my house: Roof is very flat and the material stood an 18 hours rain before painting, but not a drop of water leaked through. I painted and sanded the second coat, and it is as nice a Slate Roof. ISAAC HERTHEY, M. D.

ORANGE, KAN. Nov. 28, 1884.

I have used your Rubber Roofing, and it has given entire satisfaction. The material is much better and cheaper than shingles. If kept painted the same as Tin, it will give better satisfaction than tin, and at about half the cost.

L. H. STEFFEY,

EMPIORIA, KAN. Nov. 28, 1884.

Builder.

On his own house.

I am well pleased with the Roofing; all that see it, think it splendid: it will soon take the place of both Shingles and Tin on account of both its cheapness and durability. I have used it on porches and dwelling; the latter had a very little fall, and the Roofing does as well on flat as steep roofs. I am using it now on my own house. It is more durable than shingles, especially in *this State*, where the sun shines very hot, which is hard on shingles. The Slate Paint is boss on pine shingles, look as if they would last 50 years when painted two coats and sanded. I want every one to get the best roof, to keep rain and snow from spoiling their furniture, and yours can't be equalled.

W. H. RUCKLE,

Contractor and Builder.

ELDORADO, KANS. Nov. 14, 1884.

Two years ago—over old shingles.

The three-ply Roofing I put on my house over old shingles, over two years ago, is as good as new.

GEO. TADDIEN.

TABOR, KANS. Nov. 25, 1884.

Farmer.

Land agents opinion.

The Rubber Roofing and Slate Roofing Paint I bought of you is excellent, and gives the best satisfaction.

A. M. CLAFLIN.

SALINA, KANS. Nov. 17, 1884.

Agt. National and Union Pacific R. R. Lands.

We have used and sold this year \$300 worth your two ply Rubber Roofing. So far it is a perfect success, if it stand the snow and frost of next winter, we will heartily recommend it as the best substitute for shingles.

DRAPER, BOWYER & DORMAN.

OSWEGO, KANS. Nov. 17, 1884.

Stoves, Hardware &c.

Gets hard as a rock.

I used your Rubber Roofing on a shed, am much pleased with it; the Rubber is getting hard as a rock.

EDWIN SIKES.

SPAREVILLE, KANS. Nov. 17, 1884.

Harness, Collars & Whips.

A carpenter of long experience recommends Rubber Roofing.

I have been a Carpenter and builder for 25 years, and I find that your Rubber Roofing is the best I have ever used for the purpose; it gives the best of satisfaction.

CEDARVILLE, KANS. Nov. 13, 1884.

ALEXANDER BARRON.

Contractor & Builder.

Just what they want in Kansas.

I have used your Rubber Roofing, and it has given me the best of satisfaction, it is just what we want in this country.

CHARLES GATES.

PLEASANTON, KANS. Nov. 15, 1884.

General Merchant.

Flat Shingle Roof =always leaked, but now water tight.

I put your Rubber Roofing over shingles and think it the best roof I could put on: the Roof was too flat for *shingles*, and always leaked. Now I have a tight Roof; your Slate Paint is excellent.

A. J. WILSON, of WILSON BROS.

KIRWIN, KANS. Nov. 24, 1884.

Millers.

Windy section.—Recommend cleating.

I have used 5,000 feet your Rubber Roofing and Slate Roofing Paint, they have given satisfaction in every respect. I recommend in this windy country, battings nailed over the Roofing about 4 feet apart.

JOHN F. SOLTER.

WICHITA, KANS. Oct. 26, 1884.

Carpenter & Builder.

Used 10,000 sq. ft.

In the last two years I have used and handled over 10,000 feet your Rubber Roofing, and it has given good satisfaction.

EDWIN F. BLAZIERE.

IWING, KANS. Nov. 3, 1884.

Carpenter and Builder

Four gutters: a difficult Roof to lay.

Your Rubber Roofing arrived last summer in good condition. I applied part to a flat board Roof, and part to steep Roof, and part to a steep Roof over old shingles, with four gutters full height of Roof. Result in all cases has been very satisfactory. I am satisfied your Roofing will take the place of all other Roofing as soon as known, being easily applied, making a pretty and durable Roof. My occupation is farming. H. B. KNEELAND,

SOUTH STUKEY, QUEBEC, Feb. 19, 1885.

Chairman School Commissioners.

Leaks of 15 years effectually cured with Slate Paint.

The Roofing Paint and Cement purchased a year ago, I applied to my store Roof, flat and covered with tin; which, for fifteen years I could not stop from leaking, especially in the gutters. The result has been most satisfactory and I may say surprising, in that the roof has not leaked a drop, and it is as good as new.

JAS. E. WHITE, Fruit Dealer,

SHELBYNE, VT. Feb. 18, 1885.

Iron Roof taken off, to use Rubber Roofing.

Have used your "Rubber Roofing," and "Slate Roofing Paint;" am very much pleased with it. It is giving good satisfaction; I have just taken off an iron Roof from Winsted Hosiery Co. that leaked so that they were afraid it would spoil their machinery. They put on the Rubber Roofing: it is giving good satisfaction, and has not leaked any since, although it has not had the second coat of paint yet. I have also applied it to both flat and steep Roofs, and *recommend* Rubber Roofing. I would not use tin or shingles for a Roof for my own building, as long as I can get your genuine Rubber Roofing: it makes a good, cheap Roof.

H. M. SWEET,

Contractor and Builder.

WINSTED, CONN. Feb. 16, 1885.

Less than 1 inch fall to the foot.

I bought No. 2 Roofing of you two years ago; have given it a very hard test on a flat Roof less than 1 in. to the foot; I consider it the best Roofing of the kind in the market.

BROOKFIELD, MASS. Feb. 16, 1885.

CHAS. E. HOOD,

Contractor and Builder.

Ten years test. Slate Paint on a Roof condemned by two parties.

Some ten or twelve years since I obtained Slate Roofing Paint to cover the tin Roof of the L of my house, it leaked so badly that two separate tinmen, that called to repair it, reported that it was so bad, that it must have a new Roof. I had two coats applied and the leaks were all stopped, and remained so up to last year, when I had two more coats applied. It is all right up to this time and I don't see why it should not stand another ten years. It is the best material for tin and other Roofs, I have ever found in an experience of more than forty years building for private and public purposes.

E. P. CARPENTER,

FOXBORO, MASS. Feb. 19, 1885.

Pres. of three Building Associations.

Three years test over Shingles 20 years old.

Three years ago I used your Rubber Roofing over an old Shingle Roof that has been in use 20 years, and was in bad condition. Also used it on new flat Roof at same time. I recently examined both Roofs, and find them apparently as good as new. *Neither has ever leaked*, and I consider your Roofing as good as represented in every particular.

DAYTON, N. Y. Feb. 11, 1885.

J. M. PARMELEE.

PLEASANT BROOK, N. Y. Feb. 17, 1885.

Miller and Builder.

I applied your No. 3 Roofing on all Roofs; one over old shingles, others on smooth surfaces; all are in good condition and giving the best of satisfaction, although we have had a very hard stormy winter.

AUG. WINNE,

OSSWEGO, N. Y. Feb. 15, 1885.

Miller and Builder.

I used your No. 3 Rubber Roofing on flat Roofs, and it has given the best satisfaction. I find that painting under the laps and stripping over laps, and nail heads, with strips of cotton say 3 inches wide, makes a very tight joint.

JOE. A. WALLACE.

OSSWEGO, N. Y. Feb. 15, 1885.

Nothing better for Poultry Houses.

I used your Roofing on my poultry houses, and it has given good satisfaction.

LITTLETON, N. J. Feb. 16, 1885.

EUGENE HILL,

Breeder of "Plymouth Rocks."

A Carpenter's tests.

I covered two Roofs with your Rubber Roofing last April, with entire satisfaction to my self and owners of the buildings. I have had some experience in putting on felt and gravel Roofs, and must say your Rubber felt is the *best* I ever applied. I used one bbl. of "Slate Paint" last summer on shingle and tin Roofs, brick chimneys, and board fences, with perfect satisfaction. I know of no paint better for such purposes, and have been successful in stopping leaks in old gravel Roofs with your Slate Paint. I am a house carpenter and painter. You are at liberty to use my name in testimony to the excellent qualities of your "Rubber Roofing felt" and Slate Paint.

EBEN E. FRYE, Carpenter.

ATCO, CAMDEN Co., N. J. Feb. 16, 1885.

Does not wish a better Roofing.

The first Roofing I rec'd of you I used on a very steep Roof, and it has given good satisfaction. The second and third Roofing I used on a flat building and it gave excellent satisfaction. I could not wish any better Roofing; it is cheaper than tin or shingles, and I think with proper care, and an occasional coat of Paint, it will last a lifetime.

325 Pomeroy St., WASHINGTON, D. C., Feb. 17, 1885.

JNO. A. SEILER,

Watchman U. S. Pension Office.

Six years test : Streams of water effectually stopped with Slate Cement.

I used your Roofing material on dwelling houses and several other buildings and sheds. All has given good results. The Roof on house has been on about five or six years, and is apparently as good as when put on. Think it is a good thing for Roofs, and would especially recommend the Slate Paint and Cement for *leaky* Roofs and about windows and chimneys. I have stopped very bad leaks on one application where the water ran down in streams when there was a heavy storm, and to-day they do not leak a drop, and the Cement has been on for years. I am a practical builder, owning and running a large planing mill; but for the last few years have been manufacturing furniture mostly.

L. MORRELL,

Planing Mill &c.

MEYERSDALE, PA. Feb. 16, 1885.

The most complete Roof in the market.

The Roofing and Paint received from you has given entire satisfaction; have applied it to several buildings with good success. Have applied it to several Roofs almost *flat*, and think it quite a success, it being very easily laid and in my opinion makes the best and most complete Roof in the market. I heartily recommend it to all wishing servicable Roofs.

PARADISE, PA. Feb. 14, 1885.

A. P. WITMER, General Store.

15 years experience.—Something about a Tin Roof.

I am very much pleased with the Roofing; I put a Roof on for our druggist of the No. 3 "over shingles," and he says if he was building, he would never put Shingles on a Roof again if he could get Rubber. I was at his store last night, and in a few minutes had orders for two more Roofs: if I had a hundred sqrs. of No. 3, I could use it in a month. I have some fine sample Roofs made, which I am going to hang in different stores. I was talking with a grocer yesterday, he has a Roof about 30x30 which has a Tin Roof on, and ever since he had it put on it has given him trouble; pulling apart at joints and leaking; besides this he keeps his butter, meats, &c. in this part, and it makes it so hot in summer that he dislikes it, and will have No. 3 on. I have put on Roofs for fifteen years, and never found any to compare with this Roofing; so easily applied, and looks so nice when on.

DERRICK CITY, PA. Nov. 26, 1884.

H. E. THOMPSON.

Slate Paint unequalled for preserving Tin.

I rec'd first lot of goods early last fall, and began painting tin Roofs, water troughs, &c. The winter has been very severe on Roofing, but parties for whom I painted Roofs, are recommending the Paint very highly, and my work roofing and painting will be largely increased as soon as spring opens.

MILTON, PA. Feb. 19, 1885.

T. B. LYMAN,

Carpenter.

Rubber Roofing over Flat Shingle Roof.

I had my Roof covered with shingles; it was flat and whenever it rained or thawed, it leaked very badly. So, I sent for some Rubber Roofing, put it on, and ever since it has never leaked a drop, and we have had some pretty wet weather. I have found great satisfaction, and think it was the best thing I could do when I put your Roofing on. I work in the lumber woods.

DRIFTWOOD, PA. Feb. 16, 1885.

JACOB J. ARNDT.

Has kept pretty sharp watch.

I put your Roofing on a steep Roof covered with coarse hemlock boards, not seasoned. The result has been satisfactory. I gave it two coats of Paint and sanded it; it has not leaked a drop yet, and I have kept pretty sharp watch on it. My business at present is farming; am a carpenter by trade.

H. W. BROCKETT.

BOOTH'S CORNERS, PA. Feb. 17, 1885.

Shingles or Iron.

ICKESBURG, PERRY Co., PA. Oct. 9, 1884.

We are now building a Planing mill and Keg factory; the main building we will cover with Shingles. The boiler house we thought to cover with Iron, but heard of your Rubber Roofing, and understand from parties that it is fire-proof. Please send circular.

Shingles discarded.

October 13, 1884.

Our millwright will be here on the 15th. We will consult him with regard to your Roofing. We may cover the whole buildings with your Roofing; will need 3500 ft.

Iron discarded.

October 20, 1884.

Please ship us by freight to Mapleton, Huntingdon Co., Pa. *at once* 3800 ft. No. 3 Rubber Roofing.

The moral.—Use Rubber Roofing.

November 24, 1884.

It makes a very nice Roof, and will be used in this section of country. A number of men have been looking at it, and we would like to sell for you, what is needed in our locality.

KENDIG & HOSTETTER.

Manf. and Dealers in Lumber, Nail Keg heads, &c.

Over an old board Roof.

I used the Roofing on an old board Roof, that leaked badly; I took the lap boards off, and then applied the Roofing. I only gave it two coats of the Paint, and it gives entire satisfaction; not leaking or cracking any in the hottest weather.

E. T. KAUFFMAN,
Agt. Agricultural Implements.

CRESWELL, PA. Feb. 16, 1885.

Applied it himself, over flat Shingle Roof.

A year ago I put the Roofing over a shingle roof which was very flat, and always leaked when it rained. Since applying your Roofing it *has not leaked a drop*; altho' we have had very wet weather and extreme cold, it has not effected the Roofing. I am well pleased, and cheerfully recommend it to all wishing a *good cheap Roofing*: I put it on myself, according to directions.

G. H. COLE, Farmer.

SERENA, ILL. Feb. 23, 1885.

Used Roofing in 1879. Mantels in 1881.

We find your goods all you represent them to be: they have been used with best of results.

C. H. BENTON & CO.,

FOND-DU-LAC, Wis. Feb. 11, 1885.

Heavy and Shelf Hardware, Mill Supplies, &c

The prolific wiseacre, and what he knows of Rubber Roofing.

In June 1884 I required material for a Roof not suitable for Shingling. I was at a loss what material to use; at first I was of the opinion that a tin Roof would be the thing; I inquired price \$7.00 per sq. This was too expensive. I then sought for other material-Bodine and Manilla Roofing, but was still at a loss which to adopt. By mere accident I was told of your Rubber Roofing. I sent for a sample, with it come a circular describing its composition &c. I at once made up my mind it was ahead of anything I had heard of, and accordingly ordered sufficient to cover my building and am well pleased with results. I applied it on a Roof (hip) rather flat, well sheathed with boards, closely put together. We had several hard rain storms immediately after the Roof was laid, and contrary to the predictions of "wise-acres," (who are prolific in a country village), *it did not leak*. I applied two coats of your Roofing Paint, sanded the last coat, feel perfectly safe from leakage, and believe it to be fire proof. I feel justified in recommending it to the public as a durable Roofing, that is warm in winter, and impervious to water; in short just the kind of Roofing people *want*, being with all these qualities *inexpensive*. Your Roofing Paint I have also used for painting barns, and outhouses; think it is excellent. I have also used your mixed paint, which certainly is all you recommend it. I may add the cost of my Roof, including freight of goods, was very little more than *half* the cost of Tin, and I believe it to be far superior.

LA VALLE, Wis. Feb. 17, 1885.

JAS. J. WORTHY, M. D.

Building Paper first-class for outside use.

I used your Building Paper on *outside* of shiplap sheathing boards, running it lengthwise securing with paste, tin caps and nails. The sheathing and building paper on the outside is all that protects me and my family from the storms and blizzards of western Iowa. I would not give your material for all the other paper they have got here to expose to the weather. It costs a great deal less and is in just as good condition as when put on. The Slate Cement I put on the Roof was also effectual and I like it. I recommend the goods as first-class and all represented.

SAMUEL ROMIG,

SCHALLER, Io. Feb. 19, 1885.

Sedalia, Mo.

I would heartily recommend to the people of Sedalia the use of Glines Slate Roofing Paint for shingle Roofs. Having carefully investigated the same, it is my idea of Roofing Paint. We contracted to paint the roof of my hotel, part of it was very old and looked rough, the balance comparatively new. Now all looks uniform and smooth, and all covered with a heavy body of slate, which must of necessity be very durable and weather proof. Also painted and cemented the flat tin Roof of our kitchen, which has bothered us continually by leakages, but which seems effectually cured now.

CHAS. G. MATHEWS, Hotel.

EAST SEDALIA Mo. July 14, 1884.

The Rubber Roofing which I used gives entire satisfaction. I consider it a good, cheap and durable Roof.

L. W. WHIPPLE,

Coal and Wood.

SEDALIA, Mo. July 18, 1884.

I am fully persuaded of the necessity of painting shingle Roofs. I am also persuaded that Glines Slate Roofing Paint is *the material* for this business, being practically fire-proof and positively weather proof, stopping all leaks, preventing the warping of shingles, and perpetuating the life-time of a Roof, as well as adding much to the *looks* of a house.

SEDALIA, Mo. July 14, 1884.

CHAS. HOFFMAN, Grocer.

I have had the Roof of my home painted with "Glines Slate Roofing Paint," and am so well pleased with the work that I want to have the Roofs of all my houses painted. This Roof was very old and would have had to be torn off, and a new one put on soon, but now it seems to be as good as new. Also bad painted the flat Tin Roof of my kitchen which was leaky, with equally satisfactory results.

MRS. E. T. BROWN.

SEDALIA, Mo. July 14, 1884.

The Roof of our Baptist Church has bothered us continually by leakages in the Roof and around the belfry. The Ladies Aid Society, with the assistance of several individuals obtained your materials to paint the Roof and base of steeple; first applying cement to all doubtful places; then painted with Glines Slate Roofing Paint, and though we have had most severe storms since then, it has not leaked a drop.

CHAS. HOFFMAN, THOS. SOLLIS, M. D. Deacons of East Sedalia Bap. Church, E. 5th St.

EAST SEDALIA, Mo. July 14, 1884.

House Paint:—glossy surface on a weather beaten house.

Your house Paint was applied to outside surface, the condition of which was very bad, having stood about five years with only a priming coat, in consequence of which it was badly weather-beaten. Result was everything that could be wished: your Paint produces a bright glossy surface, and is an article that can be recommended as A 1.

CALIFORNIA, PA. Feb. 21, 1885. E. T. MARSHALL, Contractor and Builder.

Our Building Paper superior to Plastering.

Haying used your "Building Paper" for inside work instead of plastering, I am well satisfied with it. It makes a neat and serviceable job, and can see no reason why it will not be as durable as the best plastering. It protects against the cold as well, if not better, than plastering, is sightly to the eye, and when desired can be papered over or painted. It can be put on by any one of ordinary intelligence, and at any season of the year. I do not hesitate to recommend it to my friends.

WM. H. BROWN.

GAINESVILLE, VA. Feb. 26, 1885.

Works like a charm.

I used your Roofing on a flat Roof, (6 inch fall in 12 feet,) and it works like a charm. Your "number 3" is the best Roofing I ever saw. JOHN C. SCHABILE, Farmer.

MADISON, KANS. Feb. 19, 1885.

A handsome Roof and always water-tight.

I have used considerable of your Roofing, and it gives excellent satisfaction on steep or flat Roofs. It makes a handsome Roof, and is always water-tight: it is far superior to shingles in this section of country.

A. J. GRIFFITH.

MAGNOLIA, KANS. Dec. 4, 1884.

Five years Tests.

Some five years ago I ordered paint from you for my new residence just completed, White paint to coat the body two coats, and Slate color for trimmings: also Slate Roofing Paint for Tin Roofs on porch and bay windows. My house is on an eminence, very much exposed to winds and rain, and yet the colors are perfectly good. I never knew Paint to wear better or give better satisfaction. I have been engaged in the practice of law for years, and I find your Paints highly approved in other places.

F. W. EARNEST.

JONESBORO, TENN. Feb. 9, 1885.

Four years test of House Paint.—Something for Farmers to read.

You ask my opinion of your Paints; after having tried them four years, I am free to say they are altogether unequalled by any I have been able to procure. By unequalled, I mean for durability in weather as well as on inside work, and their ease of application is particularly noticeable, as brush marks, if made, seem to settle out smoothly. I painted dressed palings on one side of my yard with the Averill Paint, and the other side with the best brand of lead in the market, purposely as a test, and in three years the wood was well nigh exposed. It will be four years next May since I used your Paint on palings and casing of posts similarly exposed, and to-day they remain as perfectly painted and as glossy as when first applied save a slight soiling of dust. No whitening of clothes that rub against it, and after a rain, drops of water hang and glisten upon it as on a pitcher. The Roofing Paint I ordered for a neighbor for a shingle Roof, also another for a tin Roof and for the weather boarding of the Home Woolen Mills, gives good satisfaction to their owners. I am a farmer and have done all my own painting for over twenty years, and any farmer can do so if he will use your ready mixed Paints, so easy are they to work.

EPHRAIM LINK, Farmer.

GREENVILLE, TENN. Feb. 14, 1885.

Splendid Roof for a Foundry.

The surface on which we applied your No. 3 was very rough, of different thicknesses, and some large openings between the boards. We find it makes a splendid Roof, easily put on and very durable. We used 85 squares and covered our foundry, machine shop and blacksmith shops.

AIKEN & LIGHTON,

Iron City Foundry.

BIRMINGHAM, ALA. Feb. 21, 1885.

Hardening all the time.

The Temporary Rubber Roofing I bought of you last year, was used on a building with a very flat Roof, and is giving good satisfaction. I consider it the best and cheapest Roofing in the world. It seems to be hardening all the time.

S. C. DAVIDSON,

WARIOR, ALA. Feb. 18, 1885.

A perfect cure for worthless Tin Roofs

I used your Roofing in 1883 on top of the tin Roof of my dwelling house, which was put on very badly and leaked all round. Your Rubber Roofing was a perfect cure of the leakyness, and I can recommend your Roofing unhesitatingly.

JOHN GUTHRIE,

BANDERA, TEXAS, Feb. 21, 1885.

Pub. "Bandera Bugle."

I laid your Roofing on pine boards from which the shingles had been removed. It seems to make a water-proof Roof, and fulfil your recommendation.

GEO. RICKS,

LIBERTY, TEXAS, Feb. 21, 1885.

Cotton Planter and Real Estate Agent.

Both Roofing and Paint satisfactory.

Last year I sold and put on about 100 squares of your Rubber Roofing. Also painted a number of shingle and iron Roofs with your Slate Paint, all giving entire satisfaction.

NEELYSVILLE, O. Feb. 18, 1885.

C. M. WILSON,

Agt. American Fruit Evaporator.

No rattle to Rubber Roofing; as with Tin.

We used your No. 3 Roofing on dwelling house and stable. It has been on over a year and *we like it first rate*. I believe if taken care of and kept painted, it will last equal to Tin; and in some respects it is better, as it does not rattle in time of storms, and does not go and come in change of temperature which causes kinking and breaking in *Tin Roofs*.

MILLERSBURG, O. Feb. 12, 1885.

THOS. G. ARNOLD.

On the shores of Lake Superior.

Have numerous inquiries as to how your Rubber Roofing stands the hard freezing, rain, snow &c.; mine was put on in '82. Last winter was a fearful cold one, even for *this* cold country, and living on the shores of Lake Superior, we have lots of rain and snow. My Roof looks as well, and I have every reason to believe is as good to-day as when first put on. The sand helps makes it fire-proof against sparks, which is a point worth careful consideration. When I need any Roofing I shall certainly use Rubber Roofing.

EAGLE RIVER, MICH. June 19, 1884.

J. W. SEIGHMAN.

Superior Roof for a Barn

I covered my barn with your Roofing last fall, and it has not leaked a drop, altho' I only gave it one coat of Paint, the weather got too cold to finish. I think it superior to any other Roofing I ever saw.

WEST LEBANON, IND. Feb. 23, 1885.

WM. B. LYONS.

An unusual test.—Rubber Roofing laid on 3 inch strips,

The Rubber Roofing I bought of you, to cover a granery on my farm, has given perfect satisfaction, and is I think what you represent it to be, *in every particular*. The test in this case was severe, as I did not follow your directions for applying, and if it had failed should have blamed myself. You directed to lay it on a close boarded surface, but I laid it on a Roof covered with three inch strips three inches apart, and it has stood perfectly even. I feared it might sag or drop, during the heat of summer, between the strips, but it did not in the slightest and is to-day as straight, smooth and even as when first put on; and if painted occasionally bids fair to outlast any part of the building. My Roof had a rise of about two feet in ten. I think it a very durable and cheap Roof, light and easy to apply.

GREENSBORO, CAROLINE CO. IND. Feb. 13, 1885.

O. G. PRÉNTICE, Farmer.

Known our goods for Ten years.

Having known of your "Rubber Roofing" and "Slate Paint" for the past ten years, and feeling assured of its merits, I concluded to give it a practical test by applying it on a store building, 22x60 ft. I erected last spring. I also used it on a warehouse building, 20x50 feet built about the same time. The Roofs were rough boards laid closely and of ordinary pitch; we used the No. 3 Roofing and two coats of your genuine "Slate Paint." The work was done by men who had never seen anything of the kind, but by following your plain directions, they did a very creditable job, and it presents a very smooth and handsome surface, which has withstood great extremes of heat and cold without effecting it in the least. Its fire-proof properties should commend it for general use in the place of shingles, if there were no other advantages. It has also been applied here on flat Roofs and sheds with entire satisfaction.

H. Y. ABBOTT,

General Store.

Six years test on all kinds of Roofs.

I have used your Slate Paint on Shingle, Iron Tin and Felt Roofs for about six years, and it has given *perfect satisfaction* in all cases. Have also used it on Asbestos Roofs that had been burned with tar so they were full of cracks: I filled the cracks with cement, gave the Roof one coat of Paint, and made it water-tight. I recommend Slate Paint for all kinds of Roofs.

J. H. MILLER.

HIGHLAND, ILL. Feb. 19, 1885.

A very flat Roof—less than one inch fall to the foot.

I laid your Rubber Roofing over old shingle Roofs on several buildings, and also on flat board Roofs. One Roof had only eight inches rise in nine feet run, and they are giving *satisfaction*. I believe the demand for Rubber Roofing will rapidly increase in spite of the fact that shingles are lower in price, here, than ever before.

E. W. IRISH,

FARINA, ILL. Feb. 18, 1885.

Farmer, Apairian and Hive Manf.

Shingles painted in 1881.

I have used your "Slate Paint" on shingle Roof; the Paint has been on since 1881, and condition of surface is still good, and expect to have a good Roof for many years. I think your "Slate Paint" is the best I know of for Roofing.

LOUIS KINNE,

HIGHLAND, ILL. Feb. 11, 1885.

Merchant.

5 years test of Slate Paint.

I have used your Slate Paint about five years on old and new shingle Roofs, Tin and sheet Iron; also on felt Roofs in connection with your Slate Cement. They give the *best satisfaction* of any Paint I ever used, and I have had many kinds in the past ten years. I enclose check for barrel of Paint.

JAS. H. MILLER,

HIGHLAND, ILL. Dec. 15, 1884.

Carpenter and Builder.

Torrents of rain and not a leak.

The Roof on my building is an astonishment here, a perfect wonder, unknown; we have had torrents of rain since the Roof was put on, but not a leak.

LA VALLE, WIS. Oct. 8, 1884.

DR. JAS. J. WORTHY.

How "Slate Paint" looks on an old Tin Roof.

I used the Paint got of you last fall on a tin Roof that has been on some eight years, and has been painted twice in that time, and wanted repairing badly. The new Paint looks all right, and the roof is water-tight.

ISAAC SMITH.

BERWICK, PA. Feb. 14, 1885.

"Temporary" Roofing gives excellent satisfaction.

The Roofing you sent gives *perfect satisfaction*. I used the Temporary Roofing to repair the old Roofs of two buildings; after I nailed it down, I painted and sanded it. I never did anything of the kind before, but found no trouble in doing it. It is very easily laid. I used No. 3 Roofing, which is the best for a house; I just laid it on top of the old shingle Roof: as it was in middle of winter, I could not do otherwise. We have about 12 inches of snow on Roof now, and it is water-tight. My occupation was formerly boiling and puddling in the rolling mill, but now am an invalid.

WM. S. ROBERTS.

DANVILLE, PA. Feb. 17, 1885.

An experienced Carpenters opinion.

I am a carpenter, have laid Roofs for fifteen years and never came across anything that was so quickly and easily applied, or that could be laid over old shingles (thus saving time and expense), as your Rubber Roofing. There is about a foot of snow laying on the Roofs now, and has been for sometime. Your Roofing certainly gives good satisfaction.

DERRICK CITY, PA. Feb. 19, 1885.

H. E. THOMPSON.

We used your Roofing on our building, and it has proved very satisfactory.

W. MILLVILLE, PA. Feb. 13, 1885.

McAFOOS & MILLER,

Dry Goods and General Store.

"Slate Paint" is all you claim.

Having used considerable of your Rubber Roofing material on new board sheathing, and on old shingle Roofs, I find it to answer all that you recommend it for; being much cheaper than any other material, and rapidly put on, by any person. It certainly makes a nice Roof. Your Paint is all that it calls for, particularly your "Slate Paint."

ABERDEEN, MD. Feb. 17, 1885.

I. M. SIMMONS.

A warm and dry house.

I have used your "Slate Roofing Paint" upon tin Roofs, and your Tarred paper under slate and tin Roofing, and also under weather boarding for the purpose of making a warm dry house. Your goods give entire satisfaction.

D. F. OWENS,

ROCKVILLE, MD. Feb. 16, 1885.

Drugs, Paints, &c.

**Builders { Save in cost of material,
Save in cost of time laying.**

Your Roofing has given entire satisfaction, is perfectly tight, is in splendid condition; we consider it much cheaper and consider it much better than shingles. We applied it on a common $\frac{1}{2}$ board surface and two men put it on in about $\frac{1}{2}$ of the time it would have taken to lay shingles, and the time alone, to say nothing about the difference in *cost*, is quite a saving to the Builder.

POCOMOKE CITY, MD. Feb. 23, 1885.

Ship Builders.

How Slate Paint looks on Shingles.

We applied your Slate Paint to a sawed Shingle Roof: the result was a good, smooth, glassy surface.

BYRD & JONES,

DOE HILL, VA. Feb. 19, 1885.

General Store.

Guano works reduce their fire risks by using Rubber Roofing.

We used your "No. 3 Roofing" and "Slate Paint" two years ago, on the extension to our factory, and properly applied, we feel satisfied that they make a *tight, durable* and *fire-proof* Roof. The latter feature, with their cheapness and easy application, should commend them to all where risk from fire, is such as to render *fire insurance intolerably heavy*.

NORFOLK, VA. Feb. 12, 1885.

CHAS. REID & SON,

Manf. Farmers Favorite Guanos.

A beautiful Roof and cheaper than Shingles.

The building on which your Roofing was laid, had a wooden frame, weather boarded and sealed. The Rubber Roofing is laid on a well sheathed surface, laid with 4x4 boards. The Roof is of ordinary pitch $\frac{1}{3}$ under square. As far as I have had experience with your roofing it has proven all claimed. It is no trouble to apply; makes a most beautiful Roof, and is cheaper than shingles. After your Roofing Paint is applied, it is fire-proof as well as water tight. It makes a cheap and durable Roof, and is destined to take the place of all wooden Roofs.

O. W. FORD.

LONG RUN, W. VA. Feb. 17, 1885.

Hotels endorse Rubber Roofing.

Your Roofing gives perfect satisfaction in this section.
HARWICH, MASS. Nov. 8, 1884.

R. ELDRIDGE,
Proprietor Sea View House.

A good Roof at small cost.

I have used your Rubber Roofing and Slate Roofing Paint. It has given satisfaction and is, I think, superior to tin for many reasons, it does not expand or contract, thereby causing leaks, and is cheaper. I cheerfully recommend it as a good Roof at a small cost.
WELLESLEY, MASS. Nov. 4, 1884.

J. T. JOHNSTONE,
Carpenter and Builder.

Gives great satisfaction.

Your Rubber Roofing and Paint are giving great satisfaction.
LEEDS, MASS. Nov. 6, 1884.

Builder.

I am just building a new house, have used your Paint and Roofing on several parts of it, and so far like it very much.
NANTUCKET, MASS. Nov. 3, 1884.

WM. H. CHADWICK,
Cashier Pacific Nat. Bank.

All satisfied.

I used your Roofing on my own, and on buildings for many others; we are all satisfied with the materials. Will want large quantities next season.
CHARLEMONT, MASS. Nov. 3, 1884.

F. E. BENSON,

Carpenter.

Easily put on and very durable.

I have used your Rubber Roofing on two of my buildings, and find it satisfactory, being easily put on, and very durable.
CHICOOPEE, MASS. Oct. 31, 1884.

CHAS. BURTON, Proprietor of

The Springfield Brown Stone Quarries.

"Rubber Roofing sells itself."

The 66 squares Rubber Roofing I had of you were put on the Roofs of a stable, carriage house, coal and shaving sheds, and stock house; my experience is that it sells itself after being once introduced; everybody wants it.
GARDNER, MASS. Oct. 26, 1884.

C. F. BOUTELLE,

Architect and Builder.

Used Tin and Tar and Gravel.—Rubber Roofing leads them all!

I have used tin and tar and gravel on a number of my Roofs, but your Rubber Roofing is the best I ever used. I would cheerfully recommend it to any one wanting a good Roof at a small cost.
WELCOME FARM, LOWELL, MASS. Nov. 1, 1884.

D. E. WHEELER,

Breeder of Grade Dutch Cattle.

Gases have no effect on Rubber Roofing.

Please send us soon as possible some of your Roofing Paint, enough for a steep Roof on a building 30x66 feet. The Rubber Roofing we put on our boiler house a year ago seems to stand the gases very well.

HURLBURT PAPER CO.,

Mfrs. Fine Writing Papers.

SOUTH LEE, MASS. Sept. 29, 1884.

Hen houses.—The very Best roof.

It has given excellent satisfaction, is perfectly water-proof, and the heaviest storms do not beat under it. I think it the very best Roof for hen houses, as you can make Roof nearly flat—it also makes building warm in winter and cool in summer.

SOMERVILLE, OT. Nov. 27, 1884.

EDW. E. MALLETTTE,

Breeder of Pure-blood Fowls.

NOTE.—Our "Temporary" can be used to advantage both for the Roof, and also to line inside of hen houses; this keeps all wind out in winter, and all vermin at any time. Try it,—price low.

Slate Paint on a Tin Roof.

We used your Slate Roofing Paint on our house last spring, and are well pleased the way it spread and covered the tin.
HATFIELD, CONN. Oct. 31, 1884.

WM. S. WHITE & CO.,

Lumber Dealers.

An easy and quick Roof to put on.

We are pleased with your Roofing, and don't see why it will not last for years; it certainly is an easy and quick Roof to put on.
NORFOLK, CONN. Nov. 6, 1884.

E. S. JOHNSON,

Flour, Feed and Grain.

Covered the Roof and Side of building.

I covered my Roofs and the side of one building with your Rubber Roofing, and it gives me satisfaction.
WOONSOCKET, R. I. Nov. 18, 1884.

A. D. VOSE.

Warped Shingles become perfectly Flat.

I have used your Slate Roofing Paint on both Tin and Shingle Roofs, and find it to be all you claim. I have used it on old Shingle Roofs where the shingles were badly warped, and with two coats, the shingles were laid perfectly flat. I consider it the best Paint I ever used, and next season expect to use large quantities of it.
NEWPORT, R. I. Nov. 18, 1884.

JOHN J. BLISS,
Tin and Sheet Iron Works.
